

NETWORK TRANSPARENCY DATA REQUEST

Although ISPs are no longer subjected to prohibitions on practices such as blocking or throttling, they are now required to disclose which of the following practices they *are* engaged in. To the extent that you engage in the following practices, please explain your practice. This will allow JSI to establish a favorable description of your practices. If you do not engage in the practice, indicate “No.” JSI recommends that the ISP make a definitive statement that it does not engage in a practice.

Blocking. Practice that blocks or otherwise prevents access to lawful content, applications, service or non-harmful devices. Please provide description of what is blocked.	None
Throttling. Practice of degrading or impairing access to lawful traffic on basis of content, application, service, user, or use of a non-harmful device. Please provide description of what is throttled.	None
Affiliate Prioritization. Practice favoring some traffic over other traffic to the benefit of an affiliate. Please provide a description of the use of any techniques such as traffic shaping, prioritization, or other resource reservation. Please identify the affiliate receiving the benefit.	None
Paid Prioritization. Practice favoring some traffic over other traffic in exchange for consideration, monetary or otherwise. Please describe the use of any techniques such as traffic shaping prioritization or other resource reservation.	None
Congestion Management. Describe congestion management practices, if any. Include the types of traffic subject to the practices, purposes served by the practices, practices’ effects on end user’ experience, criteria used in practices. Indicate things triggering a practice including usage limits, typical frequency of congestion, consequences of exceeding thresholds. Provide engineering standards. How often do you monitor traffic/connections?	None
Application-Specific Behavior. Whether and why ISP blocks or rate-controls specific protocols or protocol ports, modifies protocol fields in ways not prescribed by the protocol standard, or otherwise inhibits or favors certain applications or classes of applications.	none

--	--

Device Attachment Rules. Describe any restrictions on the types of devices and any approval procedures for devices to connect to the network.	None
Network Security. Practices used to ensure end-user security or security of the network. Describe triggering conditions that cause a mechanism to be invoked.	None
Describe your Service Technologies	
Which Non-BIAS Service(s) (i.e., VoIP, IP Video) do you offer?	None
Offer mobile/wireless services?	None

Download and Upload Speeds

ISPs may obtain speed measurements through use of the Measuring Broadband America (MBA) methodology, internal testing, customer speed test data, or relevant data from third party sources.

ADVERTISED	ACTUAL SUSTAINED	PERCENTAGE DIFFERENTIAL
Download		
1.5 Mbps	1.5 Mbps	
3.0 Mbps	3.0 Mbps	
6.0 Mbps	6.0 Mbps	
10.0 Mbps	10.0 Mbps	Limited Access
15 & 25	15 & 25	Limited Access
Upload		
.512 Mbps	.512 Mbps	
1.0 Mbps	1.0 Mbps	
1.0 Mbps	1.20 Mbps	
1.0 Mbps	1.204 Mbps	

3.0 Mbps 3.0 Mbps

3.0 Mbps 3.0 Mbps
