4005 Rural Broadband Experiment

Authorized Rural Broadband Experiment (RBE) recipients must address the certification for public interest obligations and provide a list of newly served community anchor institutions.

Public Interest Obligations – FCC 14-98 (paragraphs 26-29, 78)

Please address Line 4001 regarding compliance with the Commission’s public interest obligations. All RBE participants must provide a response to Line 4001.

4001. Recipient certifies that it is offering broadband meeting the requisite public interest obligations consistent with the category for which they were selected, including broadband speed, latency, usage capacity, and rates that are reasonably comparable to rates for comparable offerings in urban areas.

Community Anchor Institutions – FCC 14-98 (paragraph 79)

4003a. RBE participants must provide the number, names, and addresses of community anchor institutions to which they newly deployed broadband service in the preceding calendar year. On this line, please respond (yes – attach new community anchors, no – no new anchors) to indicate whether this list will be provided.

If yes to 4003A, please provide a response for 4003B.

4003b. Provide the number, names and addresses of community anchor institutions to which the recipient newly began providing access to broadband service in the preceding calendar year.	Name of Attached Document Listing Required Information

SECTION 610 FUNCTIONALITY IN EMERGENCY SITUATIONS

Business Continuity Plan Overview

Introduction

Consolidated Communications, Inc. (“CCI”) is committed to maintaining a vigilant state of disaster preparedness for the interests of our customers, stockholders, employees and other critical stakeholders.

The purpose of our Business Continuity Plan (“BCP”) is to define the disaster preparedness and recovery protocols and procedures required to restore CCI’s critical business support functions, inside and outside plant systems and operations within CCI’s operating footprint.

BCP components detail CCI’s procedures for preparing for and responding to an emergency situation affecting our ability to deliver core services to our customers and our ability to meet legal dictates, and regulatory requirements.

This document discusses the following:

- BCP Scope
- BCP Components
- Plan Maintenance

BCP Scope

CCI’s business continuity response planning is concentrated on two critical operational areas:

- Customer Interfacing – It is recognized that a “business impact” only occurs when an *external-interfacing* element is disrupted. In essence, this means that if CCI experiences a disruptive event, but one that does not breach the outer-shell of the CCI operation and interrupt critical customer services, customer product or other external end-user, then it does not have a business impact, as defined by the BCP.
- Infrastructure Integrity – Without critical infrastructure systems, the ability for all other CCI business operations (back / front office) can come to a halt. It is these infrastructure systems that provide the critical human-factor of our customer-interfacing services. Critical infrastructure would address such services / systems as, building space for staff and equipment, service utilities, telecommunications and data network, IT network, and related infrastructure based items.

The BCP has been developed to assure the continuity of critical customer interfacing services and systems should a physical incident or workforce disruption event occur, which affects:

- Information Technology (“IT”)

- Administrative and Support Operations
- Inside and Outside Plant Operations
- Network Operations Center (“NOC”)
- Dispatch
- Repair Center

CCI has developed response / recovery strategies addressing physically disruptive incidents and workforce related disruptive incidents. All response strategies are based on recovery time objectives of those department functions and critical infrastructure systems essential to sustain customer interfacing services.

BCP Components

The BCP consists of several components:

- Operational Preparedness for Expected Events (i.e. weather related events)
- Event / Crisis Communication Plan
- Redundancy Mapping
- Department Recovery Plans
- Information Technology Continuity Plan

The following is a brief summary of the plan components.

Operational Preparedness for Expected Events

Weather events such rain, snow, ice and wind can negatively impact power and communications infrastructure. While this threat cannot be eliminated, CCI takes steps to mitigate a storm’s impact through preparedness and response. Steps include:

- Pre-event planning based on information provided by National Oceanic and Atmospheric Administration (“NOAA”)
- 24 hour x 365 day monitoring by Network Operations Center
- Coordinate planning and recovery efforts through state emergency management groups
- Engage supply chain vendors to delivery additional stock prior to the expected event
- Inspect, test and fuel emergency generators in anticipation of a power outage
- Reallocate / relocate staff in order to respond to the pending event

Event / Crisis Communication Plan

Communications is a key element to respond and recover business operations. CCI uses a dual level communication strategy as part the Event Communication Plan. The primary level is the workgroup comprised of both employees and vendors that are directly involved in the recovery work. The secondary level consists of internal interested parties made up of our Strategic

Leadership Team. The role of the secondary level is to facilitate communications both internally and externally regarding the event and our path to response and recovery.

Redundancy Mapping

The process of redundancy mapping reviews operations within the CCI organization to identify alternate facilities and work locations that can be used in the event a primary location is not accessible. Given the geographic spread of CCI's footprint, capabilities exist to relocate operations from event impacted areas. Through the mapping process, CCI is able to identify single points of failure and develop alternative work processes.

Department Recovery Plans

Each department has developed a recovery plan based on its critical operations as they pertain to the deliverables they contribute to our customers. CCI has triaged the recovery efforts based on the concept of customer servicing impact. Federal and State regulatory requirements, along with E-911 needs, have a high level of consideration in addition to the business impact concerns. The BCP goal is to minimize the disruption duration as much as is practical and provide a level of risk mitigation that will maintain critical operations. The recovery plans are built around a 24 hour to 72 hours response plan. This methodology focuses on the immediate steps that need to be taken to recover functional operations within short duration events (less than 24 hours) and well as long term plans to maintain functionality during an extended event (up to, or greater than 72 hours).

IT Recovery Plan

Like most operations, CCI is dependent on an IT infrastructure to conduct business and serve customers. Because of its importance, CCI has a continuity plan established specifically for IT operations. The IT continuity plan addresses security and access control of data sites, onsite / offsite data backup methods, processes for sequencing of system(s) recoveries and ultimately the use and execution of our established Disaster Recovery Site located elsewhere within the CCI footprint.

Plan Maintenance and Exercising

The BCP is a so called "living" document. Updates to the plan are ongoing with changes incorporated annually at a minimum. Individual plan components are reviewed with oversight from CCI's Risk Management Team. CCI has the BCP on a cloud based solution which will allow access to the plan components from any computer, smartphone and tablet.

**FCC FORM 481 Line 1010 – Voice Service Rate
Comparability**

The pricing of the company's voice service and Broadband service rate are no more than two standard deviations above the applicable national average urban rate for voice and broadband services, as specified in the most recent public notice, **DA 18-1280** released on December 20, 2018.

"Voice Rates. Based on the survey results, the 2019 urban average monthly rate (the rate floor) is \$26.98. Therefore, the reasonable comparability benchmark for voice services, two standard deviations above the urban average, is \$51.61. Under the Commission's rules, each ETC, including competitive ETCs providing fixed voice services, must certify in the FCC Form 481 filed no later than July 1, 2019, that the pricing of its basic residential voice services is no more than \$51.61.

FCC FORM 481 Line 1030 – Broadband Service Rate Comparability

The pricing of the companies voice service and broadband service are no more than two standard deviations above the applicable national average urban rate for voice and broadband services, as specified in the most recent public notice, FCC DA 18-1280 released on December 20, 2018.

Broadband Rates. Recipients of high-cost and/or Connect America Fund support that are subject to broadband performance obligations are required to offer broadband service at rates that are at or below the relevant reasonable comparability benchmark.¹

The following table provides the 2019 benchmark for a number of different broadband service offerings, though providers will need to determine the benchmark for services with characteristics not shown in the table.

Download Bandwidth (Mbps)	Upload Bandwidth (Mbps)	Capacity Allowance (GB)	2019 U.S. (\$)	2019 AK (\$)
4	1	200	66.12	113.19
4	1	Unlimited	70.76	119.06
10	1	200	72.31	121.54
10	1	Unlimited	77.30	127.75
25	3	200	77.65	129.52
25	3	Unlimited	82.66	135.75
25	5	200	78.49	129.78
25	5	Unlimited	83.50	136.01
50	5	Unlimited	100.85	153.64
100	10	Unlimited	106.23	161.16
250	25	Unlimited	128.69	203.67
500	50	Unlimited	148.35	223.87
1000	100	Unlimited	162.33	232.38
