**Re: Oral *Ex Parte* Notice
GN Docket No. 14-177, IB Docket Nos. 15-256 and 97-95;
RM-11664; and WT Docket No. 10-112**

Dear Ms. Dortch:

On June 23, 2016, the undersigned, on behalf of The Boeing Company (“Boeing”), sent an email to the Commission staff listed in the attachment indicating that Boeing had filed with the Commission an application for authority to launch and operate a non-geostationary satellite orbit (“NGSO”) satellite system that would operate in the fixed-satellite service (“FSS”) in the V-band¹ to provide low-latency, very high data-rate broadband service throughout the United States and internationally (“Application”).² As explained in Part V of the narrative portion of the Application (pages 74-79), the downlink operations for Boeing’s NGSO FSS system could successfully operate on a shared basis with the proposed Upper Microwave Flexible Use (“UMFU”) service in the 37.5-40.0 GHz band.

Thank you for your attention to this matter. Please contact the undersigned if you have any questions.

Sincerely,

Bruce A. Olcott

Counsel to The Boeing Company

¹ The V-band frequencies are the 37.5-42.5 GHz (downlink) and the 47.2-50.2 and 50.4-52.4 GHz (uplink) bands.

² See The Boeing Company Application for Authority to Launch and Operate a Non-Geostationary Low Earth Orbit Satellite System in the Fixed Satellite Service (S2966), SAT-LOA-20160622-00058 (Filed June 22, 2016).
