Re: Notice of *Ex Parte* Presentation, *Petition of USTelecom for Forbearance Pursuant to 47 U.S.C. § 160(c)*, WC Docket No. 18-141

Dear Ms. Dortch,

On June 27, 2018, Daniel P. Friesen, Co-Founder of IdeaTek Telecom; Dane Jasper, CEO of Sonic Telecommunications; Carson Coffman, President/COO of Socket Telecom; Brian Worthen, CEO of Mammoth Networks; Margi Shaw, CEO of First Communications; John Hoehne and Joel Miller, COO and General Counsel of Access One, respectively; and, Chip Pickering, Angie Kronenberg and the undersigned from INCOMPAS met with Travis Litman of Commissioner Rosenworcel's office.

In the meeting, the companies discussed their competitive service offerings and deployment of fiber networks. Together, these companies are providing innovative broadband service to anchor institutions, public charities, first responders, government entities, small businesses and residential consumers. A number of them are serving rural areas where there is no other broadband provider and bringing high paying, skilled jobs to these rural communities. They also have a presence in urban areas (including the many under-served urban areas) where they provide more cost effective, customized, and innovative services than offered by the incumbent and cable companies (where present).

These companies emphasized that continued access to unbundled network elements is crucial to their ability to continue to provide, and expand, these vital services in the communities they serve. The fiber builders explained how they leverage unbundled network elements in key places, while they are entering a market and building out their fiber networks. They also noted that they still face significant barriers to entry in a number of locations. The executives of these small businesses are part of the communities they serve and are passionate about bridging the digital divide and bringing more innovative services in all areas.

Consistent with the Commission goal of expanding broadband deployment and ensuring a competitive market, the Commission should dismiss USTelecom's petition outright and focus,

first, on removing existing barriers to deployment and reject the USTelecom's attempt to cut off much needed competition.

Respectfully submitted,

/s/ Karen Reidy
