<110> Has your company received its ETC certification from the FCC? (yes / no)

If your answer to Line <110> is yes, do you have an existing §54.202(a) "5 year plan" filed with the FCC? (yes / no)

If your answer to Line <111> is yes, please file a progress report, on line <112> delineating the status of your company's existing § 54.202(a) "5 year plan" on file with the FCC, as it relates to your provision of voice telephony service.

<112> Attach Five-Year Service Quality Improvement Plan or, in subsequent years, your annual progress report filed pursuant to 47 C.F.R. § 54.313(a)(1). If your company is a CETC which only receives frozen support, your progress report is only required to address voice telephony service.

Name of Attached Document

Please select the appropriate responses below (Yes, No, Not Applicable) to confirm that the attached document(s), on line 112, contains a progress report on its five-year service quality improvement plan pursuant to §54.202(a). The information shall be submitted at the wire center level or census block as appropriate.

- <113> Maps detailing progress towards meeting plan targets
- <114> Report how much universal service (USF) support was received
- <115> How much (USF) was used to improve service quality and how support was used to improve service quality
- <116> How much (USF) was used to improve service coverage and how support was used to improve service coverage
- <117> How much (USF) was used to improve service capacity and how support was used to improve service capacity
- <118> Provide an explanation of network improvement targets not met in the prior calendar year.

4005 Rural Broadband Experiment

Authorized Rural Broadband Experiment (RBE) recipients must address the certification for public interest obligations, provide a list of newly served community anchor institutions, and provide a list of locations where broadband has been deployed.

Public Interest Obligations – FCC 14-98 (paragraphs 26-29, 78)

Please address Line 4001 regarding compliance with the Commission's public interest obligations. All RBE participants must provide a response to Line 4001.

4001. Recipient certifies that it is offering broadband to the identified locations meeting the requisite public interest obligations consistent with the category for which they were selected, including broadband speed, latency, usage capacity, and rates that are reasonably comparable to rates for comparable offerings in urban areas?

Community Anchor Institutions – FCC 14-98 (paragraph 79)

4003a. RBE participants must provide the number, names, and addresses of community anchor institutions to which they newly deployed broadband service in the preceding calendar year. On this line, please respond (yes – attach new community anchors, no – no new anchors) to indicate whether this list will be provided.

If yes to 4003A, please provide a response for 4003B.

4003b. Provide the number, names and addresses of community anchor institutions to which the recipient newly began providing access to broadband service in the preceding calendar year. Name of Attached Document Listing Required Information

Broadband Deployment Locations – FCC 14-98 (paragraph 80)

4004a. Attach a list of geocoded locations to which broadband has been deployed as of the June 1st immediately preceding the July 1st filing deadline for the FCC Form 481. Name of Attached Document Listing Required Information

4004b. Attach evidence demonstrating that the recipient is meeting the relevant public service obligations for the identified locations. Materials must at least detail the pricing, offered broadband speed and data usage allowances available in the relevant geographic area. Name of Attached Document Listing Required Information

Line 510 – Description of Compliance with Service Quality and Consumer Protection

AT&T has established methods and procedures that are designed to facilitate compliance with applicable service quality standards and consumer protection rules. In the event that a service quality or consumer protection issue arises, AT&T works with appropriate government entities and/or customers to resolve the issue consistent with AT&T's obligations.

AT&T has implemented Customer Proprietary Network Information and Truth-in-Billing procedures in accordance with the Commission's requirements. AT&T also makes available the rates, terms and conditions of its service offerings through service guides, guidebooks and, where applicable, tariffs, which consumers can access through AT&T's website (*available at <http://www.att.com/gen/public-affairs?pid=11970>*). Among other things, these documents clearly explain the terms of service, including dispute resolution procedures and billing and payment requirements. Consumers are able to contact AT&T with questions or concerns through a toll-free number or online. Also, AT&T advertises its services using media of general distribution and these advertisements are clear and contain appropriate disclosures. Lastly, AT&T has a company-wide privacy policy that describes how AT&T collects, uses and protects its customer's information (*available at http://www.att.com/Common/about_us/privacy_policy/print_policy.html*).

Line 610 – Descriptive Document for Functionality in Emergency Situations

Section 54.313(a) (6) of the Commission's rules requires an Eligible Telecommunication Carrier (ETC) to certify an ability to function in emergency situations as set forth in Section 54.202(a)(2) of the Commission's rules. The standards set forth in Section 54.202(a)(2) include having a reasonable amount of back-up power to ensure functionality without an external power source, having an ability to reroute traffic around damaged facilities, and having a capability to manage traffic spikes resulting from emergency situations.

All AT&T ILEC central offices are equipped with battery backup equipment. Offices with dedicated standby generators are equipped with sufficient battery capacity to run for approximately four hours without power; offices with access to portable generators have sufficient battery capacity to operate for approximately eight hours without power. The fuel tanks supporting the standby generators are typically sized to supply enough fuel, at three-quarters full fuel capacity, for approximately one to three (or more) days runtime (the continuous operation of the engine alternator set at 100% [full] load).

Each major element of the AT&T network (IP, TDM voice, cellular, etc.) is under the oversight of a Technology Reliability Center (TRC) that manages and controls the network's operation. Technology Reliability Centers are located throughout the United States and are responsible for:

- Proactive 7x24 surveillance of network elements (fault management)
- Progress and event notification to Customer Care Centers
- Asset management (including spare equipment availability)
- Logical configuration management
- Network upgrades and change management
- Direction of the maintenance activities of business partners (including the network field operations force and capacity management).

The AT&T Global Technology Operations Center (GTOC) provides the command and control functions for the TRC organization and serves as the central point of contact for all network and application related traffic and incident management across all of AT&T. The GTOC proactively manages the data and voice traffic flowing across AT&T's domestic and global networks twenty-four hours a day, seven days a week. This proactive network management ensures maximum traffic flow by preventing, minimizing, and/or controlling disruptions to network elements and applications, and impacts to customers. It also performs storm impact reporting to ensure service impacts due to storms are mitigated as rapidly as possible and is prepared to respond to security intrusion related events and finally administers Change Restrictions to reduce risk of change caused disruptions proactively for special events and reactively for emergency conditions.

The GTOC's 3P (Preventive, Predictive, Pro-Active) process collects, identifies, and evaluates the consolidated network view of any high-risk network vulnerabilities to determine if there is a need to develop a mitigation response plan for the network.

- This process is used for National Special Security Events (NSSEs), political conventions, the Olympics, high profile sporting events, and hurricane/storm preparations.
- The mitigation plan is developed to minimize network service affecting incidents with the activation of a managed restoration plan.

- In addition to ensuring a response plan for any adverse events, the team also reviews and addresses issues such as capacity, infrastructure, and physical reliability.

AT&T emergency response teams have extensive experience in planning for and responding to a wide variety of situations, including hurricanes, floods, power outages, earthquakes and man-made disasters. We have a variety of specialist “First Strike” teams with responders that work to restore the AT&T network as quickly and safely as possible. Our Network Disaster Recovery (NDR) program allows a rapid and predictable response to the loss of an entire network office. The program includes specially trained managers, engineers and technicians from across the company, as well as a fleet of more than 320 technology recovery trailers and support vehicles that house the same equipment and components as our data-routing or voice-switching centers. The NDR process and capability has been tested in field exercises several times a year since 1992.

The AT&T Technology Operations Business Continuity Team manages business continuity risks across AT&T’s Network and IT technologies and organizations. The scope includes the development and maintenance of business continuity plans and emergency procedures consistent with industry best practices. Our plans are designed to get processes, applications and personnel back to a Business-As-Usual (BAU) state as quickly and safely as possible. The planning process includes incorporating improvement opportunities from previous events into future response activities.

AT&T’s Technology Operations Emergency Management Center manages processes, procedures, resources, and teams in response to disasters. This includes up-front prevention and mitigation efforts, as well as executing comprehensive emergency response and recovery plans in the event of a disaster or crisis:

- Business Continuity – development, maintenance, and emergency procedures consistent with industry best practices.
- Disaster Recovery – planning, testing and actual recovery of critical network infrastructure and critical IT infrastructure and applications.

In 2015, AT&T became the first telecom sector company to become certified under the new international Business Continuity Management standard (ISO 22301) for the Voluntary Private Sector Preparedness Program (PS-Prep™). AT&T received its original certification for PS-Prep in 2012. The new ISO standard is the logical successor to the previous standard and became the accepted Business Continuity Management standard worldwide. PS-Prep™ is a partnership between the Department of Homeland Security and the private sector enabling private businesses to demonstrate their capabilities for planning for, responding to, and recovering from disasters and other emergencies.

Based on the foregoing, the reporting carrier certifies it is able to function in emergency situations as set forth in Section 54.202(a)(2).

April 15, 2016

Chairperson Jeff Grubbe
Agua Caliente Indian Reservation
5401 Dinah Shore Drive
Palm Springs, CA 92264

Dear Chairperson Grubbe:

AT&T Corp. has been designated as an eligible telecommunications carrier (“ETC”) for the purpose of receiving federal high-cost universal service support (“USF”) in certain geographic locations in California, including all or part of the lands of Agua Caliente Indian Reservation. As an ETC, AT&T Corp. is subject to the rules and requirements of the Federal Communications Commission (“FCC”), including 47 C.F.R. § 54.313(a)(9), which requires high-cost USF recipients that serve Tribal lands to have discussions with Tribal governments.¹ This rule became effective August 5, 2013.²

You are receiving this letter because in 2015 AT&T Corp. received federal high-cost support in California. Although AT&T Corp. did not use federal high-cost support funds in areas governed by your Tribal government in 2015, AT&T is available for discussions with you and your colleagues about AT&T’s service and the topics set forth in 47 C.F.R. § 54.313(a)(9), such as planning, sustainability, and land use issues.

I am available to talk with you at your earliest convenience about these and other issues.

Sincerely,

A handwritten signature in cursive script, appearing to read "Peter M. Hayes".

Chairman Luther Selgado, Sr.
Cahuilla Band of Mission Indians of the Cahuilla Reservation
52701 Highway 371
Anza, CA 92539

Dear Chairman Selgado:

AT&T Corp. has been designated as an eligible telecommunications carrier (“ETC”) for the purpose of receiving federal high-cost universal service support (“USF”) in certain geographic locations in California, including all or part of the lands of Cahuilla Band of Mission Indians of the Cahuilla Reservation. As an ETC, AT&T Corp. is subject to the rules and requirements of the Federal Communications Commission (“FCC”), including 47 C.F.R. § 54.313(a)(9), which requires high-cost USF recipients that serve Tribal lands to have discussions with Tribal governments.¹³ This rule became effective August 5, 2013.¹⁴

You are receiving this letter because in 2015 AT&T Corp. received federal high-cost support in California. Although AT&T Corp. did not use federal high-cost support funds in areas governed by your Tribal government in 2015, AT&T is available for discussions with you and your colleagues about AT&T’s service and the topics set forth in 47 C.F.R. § 54.313(a)(9), such as planning, sustainability, and land use issues.

I am available to talk with you at your earliest convenience about these and other issues.

Sincerely,

A handwritten signature in black ink that reads "Peter M. Hayes".

April 15, 2016

Chairman Vincent Armenta
Santa Ynez Reservation
P. O. Box 517
Santa Ynez, CA 93460

Dear Chairman Armenta:

AT&T Corp. has been designated as an eligible telecommunications carrier (“ETC”) for the purpose of receiving federal high-cost universal service support (“USF”) in certain geographic locations in California, including all or part of the lands of Santa Ynez Reservation. As an ETC, AT&T Corp. is subject to the rules and requirements of the Federal Communications Commission (“FCC”), including 47 C.F.R. § 54.313(a)(9), which requires high-cost USF recipients that serve Tribal lands to have discussions with Tribal governments.³³ This rule became effective August 5, 2013.³⁴

You are receiving this letter because in 2015 AT&T Corp. received federal high-cost support in California. Although AT&T Corp. did not use federal high-cost support funds in areas governed by your Tribal government in 2015, AT&T is available for discussions with you and your colleagues about AT&T’s service and the topics set forth in 47 C.F.R. § 54.313(a)(9), such as planning, sustainability, and land use issues.

I am available to talk with you at your earliest convenience about these and other issues.

Sincerely,

A handwritten signature in black ink that reads "Peter M. Hayes". The signature is written in a cursive style and is positioned above a horizontal line.
