Subject: PSHB Docket No. 02-378, Region 41 – 700 MHz Regional Plan Revision

Greetings,

Our Regional Planning Committee has requested approval for minor changes to Region 41's 700 MHz Plan. The plan was modified to bring section **6.5 Trunking on the Interoperability Channels** in compliance with FCC guidelines. Specifically, we are removing the language regarding the former Reserve Channels from this section.

We have received approval/concurrence from all adjacent regions prior to this minor modification. We have been informed that approval/concurrence from adjacent regions for this minor modification is not required. Please accept this filing as submitted.

There are two attachments in addition to this cover letter. The first attachment is a (Highlighted) version that shows changes found on pages 3 and 17-18. Additions are in red print and deletions have been ~~lined through~~. The second attachment is a clean copy that shows the edited changes in a publishable format.

It is our hope that this plan will meet with your approval and allow public safety agencies in Utah the continued access to the 700 MHz spectrum. If you have any questions, do not hesitate to contact me.

Respectfully submitted,

Harold C. Clements, Chairman
Region 41, 700 MHz RPC
