**Re: Improving Competitive Access to MTEs, GN Docket No. 17-142
Petition for Preemption of Article 52, MB Docket No. 17-91**

Dear Ms. Dortch,

On July 1, 2019, Steve Morris of NCTA – The Internet & Television Association, David Don of Comcast, Jennifer Prime, on behalf of Cox Communications, and Maureen O’Connell of Charter Communications, met with Arielle Roth, Wireline Advisor to Commissioner O’Rielly, to discuss the draft Notice of Proposed Rulemaking and Declaratory Ruling in the above-referenced proceedings.¹ On July 2, 2019, the same individuals met with Jamie Susskind, Chief of Staff to Commissioner Carr. Also on July 2, 2019, Mr. Morris, Ms. Prime, Jennifer McKee of NCTA (by phone), Beth Choroser of Comcast (by phone), and Christianna Barnhart of Charter Communications (by phone) met with Travis Litman, Chief of Staff to Commissioner Rosenworcel.

In the meetings, NCTA reiterated the technical concerns expressed in its comments in these proceedings about the sharing of “in-use” wiring.² To better implement the policy underlying the proposed Declaratory Ruling, we encouraged the Commission to make clear that the definition of in-use wiring includes not just wiring to serve a particular unit, but applies to wiring currently being used to provide service in the MTE more generally (e.g., in-building WiFi, smart building technology).

NCTA also suggested two changes to the proposed Notice of Proposed Rulemaking. First, we encouraged the Commission to more clearly address the question of whether, consistent with the goal of regulatory parity, MTE regulations should apply equally to all competitors in the

² *See* NCTA Comments, MB Docket No. 17-91, at 4-6 (May 18, 2017); NCTA Comments, GN Docket No. 17-142, at 3-5, 10-11 (July 24, 2017).

MTE marketplace. We urged the Commission to seek comment on including entities that are not considered cable operators under Title VI or telecommunications carriers under Title II, as well as the implications for consumers, and for competition, of regulating some providers but not others.³ Second, as the Commission did in the Notice of Inquiry in GN Docket No. 17-142, we encouraged the Commission to solicit comment on whether it should revisit its determination that Section 628(b) extends to matters that do not explicitly involve access to satellite-delivered cable programming.⁴ In both cases, the additional questions requested by NCTA will help the Commission build a more complete record on which to consider whether additional rules, if any, are warranted.

Respectfully submitted,

/s/ Steven F. Morris
