

**Before the  
Federal Communications Commission  
Washington, D.C. 20554**

**Request for Emergency Authorization**

AT&T Services, Inc., on behalf of the First Responder Network Authority (“FirstNet”), seeks emergency authorization from the Federal Communications Commission under Section VIII of the Wireless Facilities Nationwide Programmatic Agreement to permit standard review under Section 106 to resume for the seven (7) priority sites listed in the attached exhibits. Each of these projects have been selected by the Governors of the states in which they are located as high-priority public safety locations for FirstNet to deploy. On behalf of FirstNet, AT&T plans to deploy these high-priority sites as soon as possible, including during the COVID-19 crisis if it continues, and these sites will be operational to provide communications to first responders from that date forward, both during and after that crisis. Exhibit 1 provides the list, by TCNS number of the TCNS submission date and the Federally Recognized Tribes whose closure has tolled the Section 106 review process. Exhibit 2 provides, by TCNS number, the location and general description of each project. No project for which emergency authorization is sought is located on tribal lands.
