Hi, I'm Carolyn. I live in California, I am 15, and I am going to be a Junior in high school next year. Please keep Net Neutrality. The whole purpose of the internet is for people to be able to create things on their own and share it with others, and if big companies have the power to favor their own big websites, that would defeat the purpose of it. I'm also concerned about my ability to use the internet for my academic studies, as it plays a huge role in my research on new topics and for classes. Every human has the right to use the internet, and allowing big companies to control how people use it restricts that freedom.

Thank you for taking the time to read this.
