**Re: The Colorado Public Safety Broadband Governing Body's Request for  
Commission Clarification on Guidelines for Commercial Network Interoperability  
for the Nationwide Public Safety Broadband Network (NPSBN), PS Docket Nos. 16-  
269, 12-94, 06-229, WT Docket No. 06-150**

Dear Ms. Dortch:

In regards to the comments filed July 6, 2018 by the Colorado Public Safety Broadband Governing Body (CPSBGB) requesting that the Commission clarify the guidelines for commercial network interoperability for the Nationwide Public Safety Broadband Network (NPSBN), the Colorado Governor's Office of Information Technology, Broadband Office, acknowledges the interoperability concerns raised by the CPSBGB in this filing. However, on behalf of the CPSBGB, we request that the Commission not take any further action on this matter at this time.

Consistent with Colorado's decision to Opt-In to the NPSBN on December 18, 2017, the Broadband Office will work collaboratively with the CPSBGB and FirstNet to resolve the concerns raised regarding interoperability and ensure the Colorado first responder community has access to a state of the art communications system.

We remain committed to support the mission set forth by FirstNet to deploy, operate, maintain, and improve the first high-speed, nationwide wireless broadband network dedicated to public safety.

Sincerely,

A handwritten signature in black ink, appearing to be 'B. Smith', written over a light blue horizontal line.

Chief Operating Officer - Colorado Broadband Office
