Re: In the matter of WC 17-108 Restoring Internet Freedom

Dear Chairman Pai,

Please uphold the principle of net neutrality -- we deserve a free and open Internet with strong Title II rules.

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Sincerely,  
Christopher Horner

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Sincerely,  
Pamela Kurp

Re: In the matter of WC 17-108 Restoring Internet Freedom

Dear Chairman Pai,

Dear Sirs,

Why I feel ending the current Net Neutrality laws is a very bad for our country, as well as grossly unfair action:

Equal access to speed and websites on the internet allowed it to develop into what it is and has been outstanding for small and large business alike, thus helping the overall economy.

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The internet also developed with public funding - through the military, as I understand it. It was developed with public funding, and grew to it's valuable and powerful place in society through the participation of so many people through having equal access to all websites. Broadband access providers are currently, and have been for a long time, benefiting quite handsomely through this use and outgrowth of public funds and independent community and business involvement. Ending Net Neutrality, in my view, will stifle this kind of growth, as well as stifling the free flow of communication between all people, a fundamental aspect to keeping our society balanced and fair. Ending it would unfairly enrich and empower the broadband internet access providers. The principle of Net Neutrality is what has enabled their business's to thrive in the 1st place, and now they want to hog it?

So: Please uphold the principle of net neutrality -- we deserve a free and open Internet with strong Title II rules.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Sincerely,

Dan Hallett

Re: In the matter of WC 17-108 Restoring Internet Freedom

Dear Chairman Pai,

We are NOT a developing country. We are NOT autocratic (at least for now). This is NOT ACCEPTABLE. In the countries where I work, the internet/FB/Viber are regularly blocked. Do not support rolling back the progress made.

Please uphold the principle of net neutrality -- we deserve a free and open Internet with strong Title II rules.

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. Re: In the matter of WC 17-108 Restoring Internet Freedom

Dear Chairman Pai,

Only an informed electorate can preserve democracy. Constrained information flow undercuts informing the electorate and, with it, democracy. Information-flow constraint amounts to censorship.

Corporate motives -- profit -- should not be the determinate of what the electorate has access to and how fast that access is.

Please uphold the principle of net neutrality -- we deserve ... we need a free and open Internet with strong Title II rules.

Re: In the matter of WC 17-108 Restoring Internet Freedom

Dear Chairman Pai,

Please uphold the principle of net neutrality -- we deserve a free and open Internet with strong Title II rules.

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Sincerely,  
Mary Keeler

Dear Chairman Pai,

Please uphold the principle of net neutrality -- we deserve a free and open Internet with strong Title II rules.

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Sincerely,  
Jeanne Lusignan

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Sincerely,  
Ann White

The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Each and every American citizen deserves internet access that is not subject to arbitrary whims that might alter both the price we pay and individual internet speed. ISPs should not be allowed to slow the internet speed of entrepreneurs and competitors. Internet usage has evolved since its inception due to the innovation and cooperation of its users. Each of us deserves freedom of the internet, and our ISPs should not be allowed the freedom to raise costs such that internet service is not affordable.

Thank you for respecting the millions of Americans that depend on reliable internet service to do our jobs.

Please uphold the principle of net neutrality -- we deserve a free and open Internet with strong Title II rules.

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Sincerely,  
Rayburn Wiley

Re: In the matter of WC 17-108 Restoring Internet Freedom

Dear Chairman Pai,

Please uphold the principle of net neutrality -- we deserve a free and open Internet with strong Title II rules.

The internet is a communication method for millions. It must be regulated as such. Students doing research, families staying in touch, people seeking needed information should not have to wait for slow downloads so that the ISP providers can make extra profit. We already pay tNo one else should decide for us what sites we can access or slow some down.

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

Re: In the matter of WC 17-108 Restoring Internet Freedom

Dear Chairman Pai,

Please uphold the principle of net neutrality -- we deserve a free and open Internet with strong Title II rules.

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Sincerely,  
Suzanne Greenberg

Re: In the matter of WC 17-108 Restoring Internet Freedom

Dear Chairman Pai,

Letting companies compete, letting individuals speak, that's one of those beautiful, American things. Allowing companies that don't know how to make money off the internet besides by throttling it and controlling it isn't capitalism, it isn't American. It's the swollen indolence of a dying nation, if things like this are allowed to pass.

Please uphold the principle of net neutrality -- we deserve a free and open Internet with strong Title II rules.

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Sincerely,  
Brenna Zedan

Re: In the matter of WC 17-108 Restoring Internet Freedom

Dear Chairman Pai,

Please uphold the principle of net neutrality -- we deserve a free and open Internet with strong Title II rules.

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Sincerely,  
Sally Mackey

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Sincerely,  
Stacey Nunn

Re: In the matter of WC 17-108 Restoring Internet Freedom

Dear Chairman Pai,

Please uphold the principle of net neutrality -- we deserve a free and open Internet with strong Title II rules.

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Re: In the matter of WC 17-108 Restoring Internet Freedom

Dear Chairman Pai,

Please uphold the principle of net neutrality -- we deserve a free and open Internet with strong Title II rules. The internet now has become a vital news source not controlled as it should be in a country that is supposed to be free. The Constitution starts with "We the People..." not we the corporations or only the wealthy. It would be the height of corruption to not keep the internet free of control; we'd be no better than any third world country if we don't keep the internet free in this country.

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Please uphold the principle of net neutrality -- we deserve a free and open Internet with strong Title II rules.

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Sincerely,  
Paul Ray

It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Sincerely,  
Susan Kerbel

Re: In the matter of WC 17-108 Restoring Internet Freedom

Dear Chairman Pai,

Please uphold the principle of net neutrality -- we deserve a free and open Internet with strong Title II rules.

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Re: In the matter of WC 17-108 Restoring Internet Freedom

Dear Chairman Pai,

Please uphold the principle of net neutrality -- we deserve a free and open Internet with strong Title II rules.

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Sincerely,  
Jeffrey Hickey

Re: In the matter of WC 17-108 Restoring Internet Freedom

Dear Chairman Pai,

Please uphold the principle of net neutrality -- we deserve a free and open Internet with strong Title II rules.

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Sincerely,

Re: In the matter of WC 17-108 Restoring Internet Freedom

Dear Chairman Pai,

The FCC has already correctly classified broadband as a Title II telecommunications service and has enacted reasonable rules to govern "gatekeeping" by broadband internet access providers. Blocking, throttling, and paid prioritization schemes make it possible to hinder the free flow of information over the internet.

Dear Chairman Pai,

Please uphold the principle of net neutrality -- we deserve a free and open Internet with strong Title II rules.

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Sincerely,  
Don Briggs

Re: In the matter of WC 17-108 Restoring Internet Freedom

Dear Chairman Pai,

Please uphold the principle of net neutrality.

Keeping the Internet free of blocking, throttling, and paid prioritization schemes supports the continuing innovation at the heart of the internet and American capitalism.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Please follow Ronald Regan's example in breaking up phone monopolies, and remain dedicated to a truly free market by ensuring net neutrality and preventing ISPs from discriminating and creating a privately controlled internet.

It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Sincerely,  
Fredric Burton

Re: In the matter of WC 17-108 Restoring Internet Freedom

Dear Chairman Pai,

Please uphold the principle of net neutrality -- we deserve a free and open Internet with strong Title II rules.

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Dear Chairman Pai,

Please uphold the principle of net neutrality -- we deserve a free and open Internet with strong Title II rules.

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Sincerely,  
Jess Weaver

Re: In the matter of WC 17-108 Restoring Internet Freedom

Dear Chairman Pai,

Please uphold the principle of net neutrality -- we deserve a free and open Internet with strong Title II rules.

Net neutrality is vital to 21st century citizenship and for all educational enterprises!! Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable. It makes the access to knowledge equal for all. Net neutrality is simply non-negotiable for scientific and technology research and education, two huge drivers of the American economy.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Re: In the matter of WC 17-108 Restoring Internet Freedom

Dear Chairman Pai,

Ajit Pai is operating off of false information and needs to be stopped. As FCC Chairman, Ajit is trying to roll back Net Neutrality. This will be my litmus test for my votes at the polls. Any politician who does not clearly oppose this kind of reckless governance will NOT receive my vote. Republican, Democrat or otherwise.

To simplify in case this is not clear.

"No", "Ehh" or "Meh" to Net Neutrality =  
No Vote for you.

"Yes" for Net Neutrality = Vote for you.

Please uphold the principle of net neutrality -- we deserve a free and open Internet with strong Title II rules.

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. Re: In the matter of WC 17-108 Restoring Internet Freedom

Dear Chairman Pai,

Please uphold the principle of net neutrality -- we deserve a free and open Internet with strong Title II rules.

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Sincerely,  
Lucy Sikes

Dear Chairman Pai,

Please uphold the principle of net neutrality -- we deserve a free and open Internet with strong Title II rules.

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Sincerely,  
Micheleen Karnacewicz

Please uphold the principle of net neutrality -- we deserve a free and open Internet with strong Title II rules.

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Sincerely,  
Stephanie Barton

Re: In the matter of WC 17-108 Restoring Internet Freedom

Dear Chairman Pai,

Net neutrality is crucial for our democracy. The internet is more central and indispensable, in modern life, than the telephone and the television were. It cannot be controlled for profit or for political power.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers.

The FCC must uphold that classification of broadband providers and uphold the general conduct rule.

Re: In the matter of WC 17-108 Restoring Internet Freedom

Dear Chairman Pai,

Please uphold the principle of net neutrality -- we deserve a free and open Internet with strong Title II rules.

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Sincerely,  
Jaime Whitehurst

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Sincerely,  
Lynn Massicotte

Dear Chairman Pai,

An open internet is critical.  
Please uphold net neutrality and support regulations that prevent ISPs  
from engaging in throttling and "fast lanes" and other  
gatekeeping and censorship.  
The internet is a critical public utility and should be protected.

Sincerely,  
Victoria King

Re: In the matter of WC 17-108 Restoring Internet Freedom

Dear Chairman Pai,

Please uphold the principle of net neutrality -- we deserve a free and open Internet with strong Title II rules.

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Re: In the matter of WC 17-108 Restoring Internet Freedom

Dear Chairman Pai,

Why would you end net neutrality? We need to the principle of net neutrality -- we deserve a free and open Internet with strong Title II rules.

Why would you want to block or throttle the internet? Are you looking for money from groups that have paid prioritization schemes? Net neutrality is vital to 21st century citizenship. We need to keep the Internet free of blocking, throttling, and paid prioritization schemes to ensure the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Sincerely,  
Sylvia Rolfs

Re: In the matter of WC 17-108 Restoring Internet Freedom

Dear Chairman Pai,

Please uphold the principle of net neutrality -- we deserve a free and open Internet with strong Title II rules.

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Sincerely,  
Tom Miles

Re: In the matter of WC 17-108 Restoring Internet Freedom

Dear Chairman Pai,

Please uphold the principle of net neutrality -- we deserve a free and open Internet with strong Title II rules.

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Sincerely,  
Carrie Doyle

Re: In the matter of WC 17-108 Restoring Internet Freedom

Dear Chairman Pai,

A recent poll showed that an overwhelming majority of Americans across party lines -- 77% or more -- are FOR Net Neutrality, and AGAINST this Big Cable power grab. See [http://tfreedmanconsulting.com.routing.wpmanagedhost.com/wp-content/uploads/2017/07/Tech-Policy-Poll-Summary\\_Final\\_20170710.pdf](http://tfreedmanconsulting.com.routing.wpmanagedhost.com/wp-content/uploads/2017/07/Tech-Policy-Poll-Summary_Final_20170710.pdf)

. If President Trump wants to have a good chance of being reelected and not having 2018 elections vote in many democrats, it is important that his FCC take note of these poll results and not stop Net Neutrality.

Please uphold the principle of net neutrality -- we deserve a free and open Internet with strong Title II rules.

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. Dear Chairman Pai,

Please uphold the principle of net neutrality -- we deserve a free and open Internet with strong Title II rules.

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Sincerely,  
Yvonne Elkin

Re: In the matter of WC 17-108 Restoring Internet Freedom

Dear Chairman Pai,

Please uphold the principle of net neutrality -- we deserve a free and open Internet with strong Title II rules.

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Sincerely,  
Nancy Powers

Dear Chairman Pai,

Please uphold the principle of net neutrality -- we deserve a free and open Internet with strong Title II rules.

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Sincerely,  
Beta Johnson

The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Since Internet Providers and other communications entities utilize public properties, public conveyances, public resources, enjoy the fruits of commerce in this country and do so across various jurisdictional boundaries, it seems only proper and just that they be subject to regulation and scrutiny by the various associated public entities to assure that they act in the interest of the public at large. The public resources they utilize demand they serve the interests of all citizens, not just a privileged few!

Re: In the matter of WC 17-108 Restoring Internet Freedom

Dear Chairman Pai,

Please uphold the principle of net neutrality -- we deserve a free and open Internet with strong Title II rules.

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Sincerely,  
Vincent Serapiglia

Re: In the matter of WC 17-108 Restoring Internet Freedom

Dear Chairman Pai,

Please uphold the principle of net neutrality -- we deserve a free and open Internet with strong Title II rules.

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Sincerely,  
sebastian ferraris

Re: In the matter of WC 17-108 Restoring Internet Freedom

Dear Chairman Pai,

I write today to urge the FCC to uphold the principle of net neutrality. All Americans deserve a free and open Internet with strong Title II rules.

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

I believe that broadband was correctly classified as a Title II telecommunications service in the 2015 Open Internet Order and that the general conduct rule to police gatekeeping by broadband internet access providers is sound and necessary. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Sincerely,  
Michael Wald

Re: In the matter of WC 17-108 Restoring Internet Freedom

Dear Chairman Pai,

Please uphold the principle of net neutrality -- we deserve a free and open Internet with strong Title II rules.

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Sincerely,  
Karl Reinhard

Re: In the matter of WC 17-108 Restoring Internet Freedom

Dear Chairman Pai,

Please uphold the The 2015 Open Internet Order, which correctly classified broadband as a Title II telecommunications service and created the general conduct rule to policy gatekeeping by broadband internet access providers. In the 21st century, internet access is as vital as phone service - perhaps more so in some cases. It is vitally important that all information flow at the same speed. This enables both truly free expression, and also helps start-ups and small businesses reach their customers.

Please uphold the principle of net neutrality -- we deserve a free and open Internet with strong Title II rules. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Re: In the matter of WC 17-108 Restoring Internet Freedom

Dear Chairman Pai,

Please uphold the principle of net neutrality -- we deserve a free and open Internet with strong Title II rules.

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Sincerely,  
Edmund Nespoli

Re: In the matter of WC 17-108 Restoring Internet Freedom

Dear Chairman Pai,

The days when a free and unregulated Internet was good for innovation ended when the big telecoms gobbled up their competition; now these powerful incumbents STIFLE innovation, investment, and competition, exercising their monopoly powers to wring maximum profits from consumers and content providers alike.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Re: In the matter of WC 17-108 Restoring Internet Freedom

Dear Chairman Pai,

Please uphold the principle of net neutrality -- we deserve a free and open Internet with strong Title II rules.

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Sincerely,  
Jeanne Wicks

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Sincerely,  
Daniel Bernstein

Re: In the matter of WC 17-108 Restoring Internet Freedom

Dear Chairman Pai,

Democracy depends upon a free and open Internet, so please uphold net neutrality and Title II rules.

Blocking access, throttling access, and "fast" vs. "slow" lanes all prevent free communication.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers.

FCC must not change the broadband provider classification, and must not undermine the general conduct rule.

Sincerely,  
Ned Flaherty

Re: In the matter of WC 17-108 Restoring Internet Freedom

Dear Chairman Pai,

I am writing to express my strong support for net neutrality.  
Americans deserve a free and open Internet with strong Title II rules.

Net neutrality is absolutely vital to 21st century citizenship.  
Keeping the Internet free of blocking, throttling, and paid  
prioritization schemes ensures the free flow of information. It allows  
individuals to speak and be heard. It makes online organizing for  
change possible, and it empowers the people to hold the powerful  
accountable.

The 2015 Open Internet Order correctly classified broadband as a Title  
II telecommunications service, and it wisely created the general  
conduct rule to policy gatekeeping by broadband internet access  
providers. The FCC must neither change the classification of broadband  
providers, nor undermine the general conduct rule.

Thank you for considering my opinions.

Sincerely,  
Hamilton Ross

Re: In the matter of WC 17-108 Restoring Internet Freedom

Dear Chairman Pai,

Please uphold the principle of net neutrality -- we deserve a free and open Internet with strong Title II rules.

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Sincerely,  
Daniel Shapiro

Our freedom of speech is predicated on an open marketplace of ideas, in which all voices have a chance to be heard so that the best ideas have a chance to flourish and the worst ideas are exposed as such. The internet realizes this vision more fully than any medium the Framers could have dreamed possible. To restrict it is to betray the fundamental concept of freedom of expression underlying our First Amendment rights.

Re: In the matter of WC 17-108 Restoring Internet Freedom

Dear Chairman Pai,

Please uphold the principle of net neutrality -- we deserve a free and open Internet with strong Title II rules.

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Sincerely,  
Stuart Fox

Re: In the matter of WC 17-108 Restoring Internet Freedom

Dear Chairman Pai,

Uphold the principle of net neutrality -- a free and open Internet with strong Title II rules is one of the ways in which democracy flourishes

.

Keep the Internet free of blocking, throttling, and paid prioritization schemes. Its your job to ensure the free flow of information in our democratic society. Its your job to hold greedy, control-freak corporations accountable when they try to dismantle democratic processes.

The 2015 Open Internet Order wisely and correctly classified broadband as a Title II telecommunications service. It wisely created the general conduct rule to police gatekeeping by broadband internet access providers. The FCC must NOT change the classification of broadband providers, as well as NOT undermine the general conduct rule.

Sincerely,  
Larry Mcfall

Re: In the matter of WC 17-108 Restoring Internet Freedom

Dear Chairman Pai,

Please uphold the principle of net neutrality -- we deserve a free and open Internet with strong Title II rules.

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Sincerely,  
Ronald Gelden

It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Sincerely,

Re: In the matter of WC 17-108 Restoring Internet Freedom

Dear Chairman Pai,

Please uphold the principle of net neutrality -- we deserve a free and open Internet with strong Title II rules.

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Sincerely,  
Jeff Glenn

Re: In the matter of WC 17-108 Restoring Internet Freedom

Dear Chairman Pai,

Net Neutrality is a very good thing! It allows for free commerce. It protects small merchants and business people from being either (a) relegated to page 3 of an online search, or (b) blackmailed into paying more to have their website appear closer to the top of page 1's search results. Without Net Neutrality, only deep-pocketed BIG businesses will be able to afford the "Fast Lane" of internet searches (a term used back when this was proposed last year). If we are indeed concerned for the "health" of small businesses, we must preserve their ability to successfully maintain their online presence for people searching for their goods or services.

Not only that, Net Neutrality is vital to 21st Century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information, and THAT is the essence of Freedom of Speech. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Please uphold the principle of net neutrality -- we deserve a free and open Internet with strong Title II rules.

Dear Chairman Pai,

Please uphold the principle of net neutrality -- we deserve a free and open Internet with strong Title II rules.

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Sincerely,  
Ron Chacey

It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Sincerely,  
Frances Whiteside

Re: In the matter of WC 17-108 Restoring Internet Freedom

Dear Chairman Pai,

Please uphold the principle of net neutrality -- we deserve a free and open Internet with strong Title II rules.

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Re: In the matter of WC 17-108 Restoring Internet Freedom

Dear Chairman Pai,

If we are going to survive as American citizens, we have to stop the unprecedented theft of our country - everything from lack of monopoly regulations; dark money in charge of our elections; multiple news outlets owned by powerful monopoly based corporations; lack of enforcement regarding Wall Street criminals; and in general a lawless government, not of, by, or for the people. We are in a crisis caused by unregulated, cannibalistic/predator capitalism. This is not the government we had when we were a great nation. Please begin to reverse the destruction of our society, by upholding the principle of net neutrality -- we deserve a free and open Internet with strong Title II rules - not an undemocratic system that allows self-entitled predators to prey on the public.

Sincerely,  
Thomas Shaw

Dear Chairman Pai,

Please uphold the principle of net neutrality -- we deserve a free and open Internet with strong Title II rules.

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Sincerely,  
Max Brown

Re: In the matter of WC 17-108 Restoring Internet Freedom

Dear Chairman Pai,

Please uphold the principle of net neutrality -- we deserve a free and open Internet with strong Title II rules. Net Neutrality is tied to the First Amendment of The US Constitution as part of the guaranteed right of freedom of speech. If access to information is blocked either directly or indirectly then a basic inequity is created in our culture. The First Amendment applies to everyone!

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule. Protect our Constitution and uphold Net Neutrality!

Please uphold the principle of net neutrality -- we deserve a free and open Internet with strong Title II rules.

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Sincerely,  
Tina Garza

Re: In the matter of WC 17-108 Restoring Internet Freedom

Dear Chairman Pai,

RE: Public Comment on Docket 17-108  
SUPPORT NET NEUTRALITY!

Dear American Government Policy Makers/FCC,

Net neutrality must absolutely be upheld! !  
Americans rely on the the protections in place to exercise our right to  
free speech. We are against corporations controlling what we say and  
see online and slowing or cherry-picking what we say.  
You will corrupt the Open Internet if you roll back protections.  
We need strong Title 11 rules!

Please uphold the principle of net neutrality -- we deserve a free and  
open Internet with strong Title II rules.

I believe the following:

"Net neutrality is vital to 21st century citizenship. Keeping the  
Internet free of blocking, throttling, and paid prioritization schemes  
ensures the free flow of information. It allows individuals to speak -  
and be heard. It makes online organizing for change possible, and  
empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title  
II telecommunications service, and wisely created the general conduct  
rule to policy gatekeeping by broadband internet access providers. The  
FCC must neither change the classification of broadband providers, nor  
undermine the general conduct rule."

Do not destroy the open internet by rolling back protections.  
All traffic on the Web should be treated equally!  
You should be supporting net neutrality.

Sincerely,

Carrie Nimmer

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Sincerely,  
Susan Finley

Re: In the matter of WC 17-108 Restoring Internet Freedom

Dear Chairman Pai,

Making the internet a 'pay to play' pipeline is not only harmful to consumers, it's harmful to small businesses, civic groups and communities with limited funds to have their voices heard. In fact, the only ones who would benefit from the repeal of the existing rules would be a handful of telecom corporations. A vote against Net Neutrality is a vote *\*against\** what America stands for - liberty and justice for all.

Dear Chairman Pai,

Please uphold the principle of net neutrality -- we deserve a free and open Internet with strong Title II rules.

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Sincerely,  
Kevin Laliberte

Re: In the matter of WC 17-108 Restoring Internet Freedom

Dear Chairman Pai,

Please uphold the principle of net neutrality -- we deserve a free and open Internet with strong Title II rules.

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Sincerely,  
Adrienne Frey

Re: In the matter of WC 17-108 Restoring Internet Freedom

Dear Chairman Pai,

Cable companies and internet providers like AT&T, Comcast, and Verizon will have dramatically more control over what I can see online, and can extract bribes and payments from anyone who wants to get their message out. Without the current net neutrality rules, they'll be able to block, throttle, and censor what I can see on the internet not to mention charging extra fees for decent service.

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. Re: In the matter of WC 17-108 Restoring Internet Freedom

Dear Chairman Pai,

Please uphold the principle of net neutrality -- we deserve a free and open Internet with strong Title II rules.

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Sincerely,  
Robert Reilly

Re: In the matter of WC 17-108 Restoring Internet Freedom

Dear Chairman Pai,

Please uphold the principle of net neutrality -- we deserve a free and open Internet with strong Title II rules.

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable. DO WE REALLY WANT TO START DOING THINGS LIKE RUSSIA AND CHINA AND TURKEY DO? I love this country too much to want to see us go that way, but don't think it can't happen here. Human nature always seems to find ways to oppress the less fortunate, and restricting access to communication is how it starts. Please help prevent that, and thank you; if you understand the pitfall here and act to prevent it.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Sincerely,  
Rebecca Carey

Re: In the matter of WC 17-108 Restoring Internet Freedom

Dear Chairman Pai,

Please uphold the principle of net neutrality -- we deserve a free and open Internet with strong Title II rules.

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Sincerely,  
Dr. Shelby Norris

Please uphold the principle of net neutrality -- we deserve a free and open Internet with strong Title II rules.

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Re: In the matter of WC 17-108 Restoring Internet Freedom

Dear Chairman Pai,

Please uphold the principle of net neutrality -- we deserve a free and open Internet with strong Title II rules.

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Sincerely,  
Mike Kelly

Re: In the matter of WC 17-108 Restoring Internet Freedom

Dear Chairman Pai,

I use the internet daily to do research, follow the news, listen to radio shows and podcasts, and communicate to friends and family. Please do not eliminate or weaken the rules that protect the internet from monopolization, politicalization, and corporate prioritization. Net neutrality keeps us all on the same "page," and that is the only way that we should have it.

Please uphold the principle of net neutrality -- we deserve a free and open Internet with strong Title II rules.

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

Re: In the matter of WC 17-108 Restoring Internet Freedom

Dear Chairman Pai,

Please uphold the principle of net neutrality -- we deserve a free and open Internet with strong Title II rules.

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Sincerely,  
Barbara Ryland

Dear Chairman Pai,

Please uphold the principle of net neutrality -- we deserve a free and open Internet with strong Title II rules.

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Sincerely,  
d. van eyck

It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Sincerely,  
Peter Ehrlich

Re: In the matter of WC 17-108 Restoring Internet Freedom

Dear Chairman Pai,

Please uphold the principle of net neutrality -- we deserve a free and open Internet with strong Title II rules.

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Re: In the matter of WC 17-108 Restoring Internet Freedom

Dear Chairman Pai,

Please uphold the principle of net neutrality -- we deserve a free and open Internet with strong Title II rules.

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Sincerely,  
Joann Lapolla

Re: In the matter of WC 17-108 Restoring Internet Freedom

Dear Chairman Pai,

Not allowing Net Neutrality is a big problem. Why on earth would we allow service providers choose what we should or should not see, giving preference to sites and businesses that pay to be given preferential treatment?

Please uphold the principle of net neutrality -- we deserve a free and open Internet with strong Title II rules.

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. Re: In the matter of WC 17-108 Restoring Internet Freedom

Dear Chairman Pai,

Please uphold the principle of net neutrality -- we deserve a free and open Internet with strong Title II rules.

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Sincerely,  
James Sherrel

Re: In the matter of WC 17-108 Restoring Internet Freedom

Dear Chairman Pai,

Please uphold the principle of net neutrality -- we deserve a free and open Internet with strong Title II rules.

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

As a specific example: the five most important companies in today's business sector began as small startups; if we want to replicate such successes in the future, companies with near-zero advertising budgets need to have equal access to the internet along with the behemoths against whom they might be competing. Even a "market friendly" administrator can see the wisdom in this. Creating special playing fields for already-successful companies so that they can suppress any competition is not only "un-American", it's downright bad capitalism.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to police gate-keeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Sincerely,  
Jim Van Zee

It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Sincerely,  
Dinah Holtzman

Re: In the matter of WC 17-108 Restoring Internet Freedom

Dear Chairman Pai,

Please uphold the principle of net neutrality -- we deserve a free and open Internet with strong Title II rules.

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Re: In the matter of WC 17-108 Restoring Internet Freedom

Dear Chairman Pai,

Please uphold the principle of net neutrality -- we deserve a free and open Internet with strong Title II rules.

Net neutrality was agreed upon at the introduction of the Internet to consumers some 20 years ago. Those at the FCC and in the administration agreed that it was the right thing for the country for everyone to have equal access. Americans still have equal access to the radio waves, to network and public television stations, to information of all kinds. Net neutrality is a critical part of the free flow of information. Corporations are not people, they are entities that can be bought and can buy others. It is the responsibility of the FCC to assure the American people that access to the smallest, as well as the largest sources of information are available to us at any time of day -- not just when a corporation is paying to keep us from accessing it due to their "greater need." The FCC and these corporations should both take their responsibility to the people of America a damned site more seriously.

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Dear Chairman Pai,

Please uphold the principle of net neutrality -- we deserve a free and open Internet with strong Title II rules.

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Sincerely,  
Alan Condit

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Sincerely,

Re: In the matter of WC 17-108 Restoring Internet Freedom

Dear Chairman Pai,

We need net neutrality -- we need a free and open Internet with strong Title II rules. This is a democracy which relies on informed citizens. Most of us get information through the internet so it is vitally important that we keep the internet open and available to everyone.

Net neutrality is required for 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Sincerely,  
Barbara Merritt

Re: In the matter of WC 17-108 Restoring Internet Freedom

Dear Chairman Pai,

Please uphold the principle of net neutrality -- we deserve a free and open Internet with strong Title II rules.

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Sincerely,  
Chris Phelps-Thiry

Dear Chairman Pai,

Please uphold the principle of net neutrality -- we deserve a free and open Internet with strong Title II rules.

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Sincerely,  
Gary Goldbaum

Re: In the matter of WC 17-108 Restoring Internet Freedom

Dear Chairman Pai,

Please recall that your role at the FCC is to protect consumers, not corporations. Try to forget your former employer and remember your sworn duty to uphold the Constitution, and the Freedom's that it was written to protect.

Please uphold the principle of net neutrality -- we deserve a free and open Internet with strong Title II rules.

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

Please uphold the principle of net neutrality -- we deserve a free and open Internet with strong Title II rules.

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Sincerely,  
Ellen Vogel

Re: In the matter of WC 17-108 Restoring Internet Freedom

Dear Chairman Pai,

I strongly support the principle of net neutrality -- we deserve a free and open Internet with strong Title II rules.

For me, my family, my children, and eventually my grandchildren, net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak and be heard and new businesses to grow and thrive on a level playing field.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Re: In the matter of WC 17-108 Restoring Internet Freedom

Dear Chairman Pai,

Please uphold the principle of net neutrality -- we deserve a free and open Internet with strong Title II rules.

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Re: In the matter of WC 17-108 Restoring Internet Freedom

Dear Chairman Pai,

Please uphold the principle of net neutrality -- we deserve a free and open Internet with strong Title II rules.

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Sincerely,  
Paul Zavada

Re: In the matter of WC 17-108 Restoring Internet Freedom

Dear Chairman Pai,

Please uphold the principle of net neutrality -- we deserve a free and open Internet with strong Title II rules.

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Sincerely,  
Elizabeth Domigan

Re: In the matter of WC 17-108 Restoring Internet Freedom

Dear Chairman Pai,

Please uphold the principle of net neutrality -- we deserve a free and open Internet with strong Title II rules.

Heed the huge number of citizens, many of whom have addressed you through a wide range of organizations devoted to the public interest, who believe net neutrality to be a matter of fundamental importance. Serve the public, not the special interests whose sole concern is to magnify their own power and wealth.

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

Re: In the matter of WC 17-108 Restoring Internet Freedom

Dear Chairman Pai,

Please uphold the principle of net neutrality -- we deserve a free and open Internet with strong Title II rules.

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Sincerely,  
Barbara Troxel

Dear Chairman Pai,

Please uphold the principle of net neutrality -- we deserve a free and open Internet with strong Title II rules.

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Sincerely,  
Ray Bernhardt

Re: In the matter of WC 17-108 Restoring Internet Freedom

Dear Chairman Pai,

Please uphold the principle of net neutrality -- we deserve a free and open Internet with strong Title II rules.

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Sincerely,  
Ellen Burton

Re: In the matter of WC 17-108 Restoring Internet Freedom

Dear Chairman Pai,

Please uphold the principle of net neutrality -- we deserve a free and open Internet with strong Title II rules.

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Sincerely,  
Richard Carr

Please uphold the principle of net neutrality -- we deserve a free and open Internet with strong Title II rules.

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Sincerely,  
Lisa Trent

Dear Chairman Pai,

Please uphold the principle of net neutrality -- we deserve a free and open Internet with strong Title II rules.

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Sincerely,  
Julie Mock-Linville

Please uphold the principle of net neutrality -- we deserve a free and open Internet with strong Title II rules.

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Sincerely,  
Charles Bartlett

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Sincerely,  
Cheryl Moore

Re: In the matter of WC 17-108 Restoring Internet Freedom

Dear Chairman Pai,

Please uphold the principle of net neutrality -- we deserve a free and open Internet with strong Title II rules.

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Sincerely,  
Jere Shaw

Dear Chairman Pai,

Please uphold the principle of net neutrality -- we deserve a free and open Internet with strong Title II rules.

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Sincerely,  
Lynn Friedman

It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Sincerely,  
Diona Jacobson

Re: In the matter of WC 17-108 Restoring Internet Freedom

Dear Chairman Pai,

Please uphold the principle of net neutrality -- we deserve a free and open Internet with strong Title II rules.

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Sincerely,  
Kenneth Rose

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Sincerely,  
Joanne Shreve

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Sincerely,  
Gardenia Gardener

Please uphold the principle of net neutrality -- we deserve a free and open Internet with strong Title II rules.

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Sincerely,  
Alexandra Bonomo

Re: In the matter of WC 17-108 Restoring Internet Freedom

Dear Chairman Pai,

Net neutrality is under attack by a few extremely wealthy individuals that stand to gain even more wealth by stealing net access rights from the rest of us. Please do your job, and represent us, the plebeians, by standing up to the attacks on net neutrality. Preserve net neutrality and in doing so, you will protect access to knowledge for all of us ordinary citizens. Knowledge is power; please do not shift access to the power into the hands of greedy individuals that intend to profit more from it than they already have.

Please uphold the principle of net neutrality -- we deserve a free and open Internet with strong Title II rules.

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Sincerely,  
Megan Ingegno

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Sincerely,  
Steven Wiese

Re: In the matter of WC 17-108 Restoring Internet Freedom

Dear Chairman Pai,

Please uphold the principle of net neutrality -- we deserve a free and open Internet with strong Title II rules.

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Sincerely,  
Nina Garfinkel
