Re: Comments of Common Cause members and supporters concerning WC Docket 17-108  
*Restoring Internet Freedom*

Common Cause<sup>1</sup> members and supporters believe a robust communications ecosystem is vital to 21<sup>st</sup> century democracy. Voters inform themselves online; advocates organize themselves online; and everyday people debate the issues of the day online. The open internet is essential to the free flow of information and debate, and thus, self-governance. Common Cause members care deeply about net neutrality. They have worked tirelessly for years to ensure – and defend – the 2015 Open Internet Order.

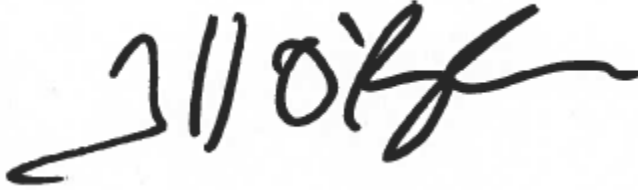

They applauded the Commission's previous decision to correctly classify broadband internet access service as a telecommunications service. Accordingly, they are deeply concerned that any reversion to subject broadband access service to a Title I or information service classification would profoundly undermine online free speech and free expression. Sanctioning blocking or paid prioritization, in particular, would jeopardize the ability of voters – including many Common Cause members – to participate in informed civic discourse.

---

<sup>1</sup> Common Cause is a nationwide, nonpartisan grassroots network dedicated to upholding the core values of American democracy. On behalf of its more than 900,000 members in all 50 states, Common Cause works to create open, honest, and accountable government that serves the public interest; and to empower all people to make their voices heard in the political process.

Attached are the comments of Common Cause members concerning the above captioned proceeding.

Respectfully submitted,

A handwritten signature in black ink, appearing to read "T O'Boyle", with a stylized flourish extending to the right.

Re: In the matter of WC 17-108 Restoring Internet Freedom

Dear Chairman Pai,

Please uphold the principle of net neutrality -- we deserve a free and open Internet with strong Title II rules.

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Sincerely,  
Terry Eaton

Re: In the matter of WC 17-108 Restoring Internet Freedom

Dear Chairman Pai,

Please uphold the principle of net neutrality -- we deserve a free and open Internet with strong Title II rules.

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Sincerely,  
Sarah Stevens

Re: In the matter of WC 17-108 Restoring Internet Freedom

Dear Chairman Pai,

I am a mathematics instructor and have been for 30 years. Nothing has been so effective for students learning mathematics than the ability to access and retrieve answers to important questions almost instantly on the web. And we math teachers, I one of them, have collectively put up tens of thousands of free videos and interactive pages for students to use as they study. Whole textbooks and full course are available free online.

And speed matters. I do not want my students, or any students to be short changed or even slowed down in their interaction with ideas and the learning that is so essential for their future. Keep the net neutral. Do not allow others to buy up and sell off all the speed and accessibility. That is a very, very short sided way to think about the potential of this essential resource!

Sincerely,  
Charlotte Hutt

Re: In the matter of WC 17-108 Restoring Internet Freedom

Dear Chairman Pai,

We live in a country at once was known by a public majority to be the greatest country in the world because we were free and we were afforded that Freedom by fighting for what we believe in but now we live in a country where the very capitalism that made us so great is now responsible 4 corruption at the greatest level. so please, for the future sake of our country kids and grandchildren remember that the results of your decision will drastically alter the future Freedom's that are forefathers fought and died for! Don't become another government agency to fall into a ever-widening group of government agencies are completely corrupted from Big Business! From my point of view and all those whom are not involved in big business or big government we know and see how bad our country is hemorrhaging and teetering on disaster.....:(  
Please uphold the principle of net neutrality -- we deserve a free and open Internet with strong Title II rules.

It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Sincerely,  
James Ferris

Re: In the matter of WC 17-108 Restoring Internet Freedom

Dear Chairman Pai,

Please uphold the principle of net neutrality -- we deserve a free and open Internet with strong Title II rules.

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Sincerely,

Re: In the matter of WC 17-108 Restoring Internet Freedom

Dear Chairman Pai,

Please uphold the principle of net neutrality -- we deserve a free and open Internet with strong Title II rules.

Before I obtained my current job at a non-profit, I spent several years unemployed and underemployed and trying to look for work. I was able to use the Internet to find volunteer opportunities and community college classes to enhance my professional skills. If it wasn't for a free and open Internet, it would have been much harder to access job postings from organizations that don't have the economic resources as larger corporations.

Thanks to a free and open Internet, I can find the news and information I need - uncensored - to help me make sound and responsible decisions as a good citizen and member of a democracy. I also worry that if net neutrality isn't protected, that will squelch scientific innovation, stifle artistic creativity and inhibit robust business creation. Many small and medium-sized businesses rely on having reliable and accessible web sites to retain customers.

If the United States is to continue moving forward in the 21st century, we need a free, fair and open Internet. Do not roll back net neutrality!

Sincerely,  
Sylvia Moore

Re: In the matter of WC 17-108 Restoring Internet Freedom

Dear Chairman Pai,

Please uphold the principle of net neutrality -- we deserve a free and open Internet with strong Title II rules.

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Sincerely,  
Alan Hubberman

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Sincerely,  
Susan Huey

It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Sincerely,  
Suzonne Davids

Re: In the matter of WC 17-108 Restoring Internet Freedom

Dear Chairman Pai,

Please uphold the principle of net neutrality -- we deserve a free and open Internet with strong Title II rules.

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Re: In the matter of WC 17-108 Restoring Internet Freedom

Dear Chairman Pai,

Please uphold the principle of net neutrality -- we deserve a free and open Internet with strong Title II rules.

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Sincerely,  
Elizabeth Mcauliffe

Re: In the matter of WC 17-108 Restoring Internet Freedom

Dear Chairman Pai,

Please uphold the principle of net neutrality -- we deserve a free and open Internet with strong Title II rules.

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Sincerely,  
Annabelle Czimback

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Sincerely,  
saul leonard

Re: In the matter of WC 17-108 Restoring Internet Freedom

Dear Chairman Pai,

Please uphold the principle of net neutrality -- we deserve a free and open Internet with strong Title II rules.

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Sincerely,  
Michael Custard

Please uphold the principle of net neutrality -- we deserve a free and open Internet with strong Title II rules.

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Sincerely,  
Donald Williams

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Sincerely,  
Sheila Schrieber

Re: In the matter of WC 17-108 Restoring Internet Freedom

Dear Chairman Pai,

Please do your job and follow the will of the people and thousands of groups and businesses that will be hurt by any changes, and not the handful of cable/phone companies that stand to make billions and ruin the Internet for so many.

Please uphold the principle of net neutrality -- we deserve a free and open Internet with strong Title II rules.

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

Re: In the matter of WC 17-108 Restoring Internet Freedom

Dear Chairman Pai,

Please uphold the principle of net neutrality -- we deserve a free and open Internet with strong Title II rules.

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Sincerely,  
Richard Journagin Jr

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Sincerely,  
John Nadolski

Re: In the matter of WC 17-108 Restoring Internet Freedom

Dear Chairman Pai,

Please uphold the principle of net neutrality -- we deserve a free and open Internet with strong Title II rules.

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Sincerely,  
Karen Mccaw

It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Sincerely,  
Christopher Keeslar

Re: In the matter of WC 17-108 Restoring Internet Freedom

Dear Chairman Pai,

Please uphold the principle of net neutrality -- we deserve a free and open Internet with strong Title II rules.

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Sincerely,  
Katherine Kelly

Re: In the matter of WC 17-108 Restoring Internet Freedom

Dear Chairman Pai,

Please uphold the principle of net neutrality -- we deserve a free and open Internet with strong Title II rules.

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Sincerely,  
Angie Aldebol

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Sincerely,  
Deborah Woodward

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Sincerely,  
RoseMarie Roth

Re: In the matter of WC 17-108 Restoring Internet Freedom

Dear Chairman Pai,

Please uphold the principle of net neutrality -- we deserve a free and open Internet with strong Title II rules.

Net neutrality is vital to 21st century citizenship and to the protection of free speech and freedom of association. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Blocking net neutrality and allowing service providers to pick and choose which sites we are able to access demolishes free speech and impedes regular citizens' full participation in society. It opens the door to corporate censorship and therefore represents an attack on our fundamental rights.

I know you don't care and it's just about getting more money for your dirtbag telecom executive friends, but this is an invitation for competing ISPs that allow users full access to the Internet to enter the market; you may not see it this way now, but by failing to uphold net neutrality, ISPs would invite their own demise. You old farts might up with this shit, but my generation won't. We're coming for you.

Sincerely,  
Jesse Philbin

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Sincerely,  
Michael Hotter

It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Sincerely,  
Gabriel Gomes

Re: In the matter of WC 17-108 Restoring Internet Freedom

Dear Chairman Pai,

Please uphold the principle of net neutrality -- we deserve a free and open Internet with strong Title II rules.

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Re: In the matter of WC 17-108 Restoring Internet Freedom

Dear Chairman Pai,

Please uphold the principle of net neutrality -- we deserve a free and open Internet with strong Title II rules. Net neutrality is vital to our democracy, and it is questionable whether we will remain a democracy without it. The evidence is clear in authoritarian countries that net neutrality is one of the first freedoms that is revoked.

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

Dear Chairman Pai,

Please uphold the principle of net neutrality -- we deserve a free and open Internet with strong Title II rules.

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Sincerely,  
MARY KAZANOWSKI

Re: In the matter of WC 17-108 Restoring Internet Freedom

Dear Chairman Pai,

Please uphold the principle of net neutrality -- we deserve a free and open Internet with strong Title II rules.

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Sincerely,  
Kathy Gault

Please uphold the principle of net neutrality -- we deserve a free and open Internet with strong Title II rules.

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Sincerely,  
Jacob Delbridge

Re: In the matter of WC 17-108 Restoring Internet Freedom

Dear Chairman Pai,

Please defend and support equal access to and use of the internet for ALL users. Loss of the extremely important Freedom to Communicate is at stake, so I ask you to uphold the principle of net neutrality -- we deserve a free and open Internet with strong Title II rules.

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Sincerely,  
Zakia Kator

Re: In the matter of WC 17-108 Restoring Internet Freedom

Dear Chairman Pai,

Please uphold the principle of net neutrality -- we deserve a free and open Internet with strong Title II rules.

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Sincerely,  
Laura Roberts

Re: In the matter of WC 17-108 Restoring Internet Freedom

Dear Chairman Pai,

Please uphold the principle of net neutrality -- Americans deserve a free and open Internet with strong Title II rules.

It's working well. Any attempts to degrade net neutrality will only degrade the internet and our democracy. It is absolutely necessary for the FCC to keep the internet free of blocking, throttling, and paid prioritization schemes that would serve nobody but a few already rich and powerful companies.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Re: In the matter of WC 17-108 Restoring Internet Freedom

Dear Chairman Pai,

Please uphold the principle of net neutrality -- we deserve a free and open Internet with strong Title II rules.

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Sincerely,  
Charles Abele

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Sincerely,  
Kara Furlong

Re: In the matter of WC 17-108 Restoring Internet Freedom

Dear Chairman Pai,

Please uphold the principle of net neutrality -- we deserve a free and open Internet with strong Title II rules.

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Sincerely,  
Patricia Gamache

Dear Chairman Pai,

Please uphold the principle of net neutrality -- we deserve a free and open Internet with strong Title II rules.

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Sincerely,  
Debra Hanson

Re: In the matter of WC 17-108 Restoring Internet Freedom

Dear Chairman Pai,

The internet is a crucial tool of information, and of the free exchange of ideas, information and entertainment between individuals and small businesses organizations, as much as by large. The principle of net neutrality - that all providers of internet content have the same access to the means of communication - is essential to maintaining this. Ending this principle, and allowing ISPs to introduce systems such as blocking, throttling, and paid prioritization schemes, would make it much harder for ordinary people and small organizations to have their voices heard, and communicate with others.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

I urge you to preserve the principle of Net Neutrality.

Re: In the matter of WC 17-108 Restoring Internet Freedom

Dear Chairman Pai,

Please uphold the principle of net neutrality -- we deserve a free and open Internet with strong Title II rules.

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Dear Chairman Pai,

Please uphold the principle of net neutrality -- we deserve a free and open Internet with strong Title II rules.

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Sincerely,  
Grace Ostermann

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Sincerely,  
Jillian Borrow

Re: In the matter of WC 17-108 Restoring Internet Freedom

Dear Chairman Pai,

The free exchange of ideas is essential to a functioning democracy. The airwaves and public utilities through which most of that exchange takes place are owned by the People and should be freely available to them. Claims that an open internet stifles innovation requires defining "innovation." If innovation is a code word for discovering new ways to limit public participation in public affairs to stifle expressions of public discontent, or a code word for limiting competition in the market place to increase profits for Verizon and Comcast, then innovation is not a democratic value. But, the truth is that real innovation, the kind that comes from new thinking and fresh ideas by individuals and small organizations, will be the victim if the FCC sells our internet to corporations.

Please uphold the principle of net neutrality -- we deserve a free and open Internet with strong Title II rules.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Re: In the matter of WC 17-108 Restoring Internet Freedom

Dear Chairman Pai,

Please uphold the principle of net neutrality -- we deserve a free and open Internet with strong Title II rules.

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Sincerely,  
George Wilson

Re: In the matter of WC 17-108 Restoring Internet Freedom

Dear Chairman Pai,

Please uphold the principle of net neutrality -- we deserve a free and open Internet with strong Title II rules.

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Sincerely,  
Linda McPherson

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Sincerely,

Re: In the matter of WC 17-108 Restoring Internet Freedom

Dear Chairman Pai,

Please uphold the principle of net neutrality -- we deserve a free and open Internet with strong Title II rules.

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Sincerely,  
Linda Schmid

Please uphold the principle of net neutrality -- we deserve a free and open Internet with strong Title II rules.

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Sincerely,  
Rene Boufford

Re: In the matter of WC 17-108 Restoring Internet Freedom

Dear Chairman Pai,

America must have a free and open internet with strong Title II rules that protect and maintain net neutrality. Anything less negates our fundamental democratic principle of free speech and creates inequality in information access and distribution based on ability to pay.

Equal access to the internet enhances scientific and medical research and innovation, supports public and consumer education, enables non-profit organizations to advance their missions, and provides a fair and open marketplace for business development.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Re: In the matter of WC 17-108 Restoring Internet Freedom

Dear Chairman Pai,

Please uphold the principle of net neutrality -- we deserve a free and open Internet with strong Title II rules.

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Sincerely,  
Cara Abts

Re: In the matter of WC 17-108 Restoring Internet Freedom

Dear Chairman Pai,

The internet can not become limited by the needs of influential corporations. We need internet neutrality.

I support internet free speech not unduly influenced by corporations.  
Keep intact the 2015 Open Internet Order correctly classified broadband  
as a Title II telecommunications service.

Sincerely,  
Karen Sterling

Re: In the matter of WC 17-108 Restoring Internet Freedom

Dear Chairman Pai,

Please uphold the principle of net neutrality -- we deserve a free and open Internet with strong Title II rules.

Net neutrality is essential for economic growth and vital to citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information and helps to dissuade vested interests from choking off new business and ideas which are the main source of job growth.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Sincerely,  
Fred McKee

Dear Chairman Pai,

Please uphold the principle of net neutrality -- we deserve a free and open Internet with strong Title II rules.

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Sincerely,  
Cynthia Allger

Re: In the matter of WC 17-108 Restoring Internet Freedom

Dear Chairman Pai,

Remember when we all had television and it was free. Remember also that US taxpayers were responsible for bringing that technology to us, not the private sector who later used this technology for FREE. Back in those times we also had a much better economy. This is when businesses and the rich did pay a more fairer share of taxes.

Then came cable tv and it was hyped as something so great, but over decades, cable television became expensive and unaffordable. I am actually ready to give up tv altogether, but I can't give up the internet because it's my NEW PHONE, my lifeline for emergencies, information, my sub jobs, and hundreds of other valuable uses that I cannot survive without--without net neutrality, my lifeline would be cut short or eventually severed from contact with my community, my country, important news and information, or if I new quick answers in an emergency. Net Neutrality is our lifeline!

Please uphold the principle of net neutrality -- we fought long and hard for this, a free and open Internet with strong Title II rules.

Your arguments against having the internet classified under title II of the Telecommunications Act are nothing but fiction. I have been dedicated to this cause of internet freedom for 5 years and I am well-read on your industry-sided buddies' arguments, which are flat out lies that can easily be proved wrong. For example, last year, overall (without cherry-picking the numbers like your folks did), telecommunication companies invested another 5% more to upgrade their technology in this year alone, while your group said the opposite. We can read between your lines and see where your holes are.

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor

It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Sincerely,  
Michael Toriello

Re: In the matter of WC 17-108 Restoring Internet Freedom

Dear Chairman Pai,

Please uphold the principle of net neutrality -- we deserve a free and open Internet with strong Title II rules.

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Sincerely,

Re: In the matter of WC 17-108 Restoring Internet Freedom

Dear Chairman Pai,

A open internet neutral as to directed content must be the goal of a free people. It is another form of free speech. The internet provider can not and should not have the ability to control the information it provides through the internet based on who pays for preferred feed. Please uphold the principle of net neutrality -- we deserve a free and open Internet with strong Title II rules.

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. Re: In the matter of WC 17-108 Restoring Internet Freedom

Dear Chairman Pai,

Please uphold the principle of net neutrality -- we deserve a free and open Internet with strong Title II rules.

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Sincerely,  
Georgia Bellas

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Sincerely,  
John Kerschbaum

Re: In the matter of WC 17-108 Restoring Internet Freedom

Dear Chairman Pai,

Please uphold the principle of net neutrality -- we deserve a free and open Internet with strong Title II rules.

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Sincerely,  
Kathy Codianne

Dear Chairman Pai,

Please uphold the principle of net neutrality -- we deserve a free and open Internet with strong Title II rules.

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Sincerely,  
Gerald Ellefson

Re: In the matter of WC 17-108 Restoring Internet Freedom

Dear Chairman Pai,

I am writing to express my abiding commitment and support for the principle of net neutrality -- we deserve a free and open Internet with strong Title II rules.

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule. ISPs historically receive the lowest ratings for customer satisfaction. Their virtual monopoly position in most locales has rendered them entirely unresponsive to the concerns of customers. Changing the rules so that ISPs can offer a preferred status to customers who can afford to pay more would severely hinder and disadvantage the vast majority of internet users who have thrived under the level playing field maintained under existing net neutrality rules.

The expressed determination of the present FCC chairman to weaken and undermine the equality of access that currently exists in cyberspace makes one wonder about the hold that ISPs have over him. No doubt his prior affiliation with Verizon has something to do with his advocacy for changes which the vast majority of Americans are steadfastly opposed to.

Sincerely,  
Hugh Heisler

Re: In the matter of WC 17-108 Restoring Internet Freedom

Dear Chairman Pai,

The rules require that telecom and cable companies treat all information flows equally and do not collect fees to prioritize any application or content.

without net neutrality, fees might be imposed and those users would get priority to the detriment of small business and us ordinary users.  
some info would load faster than others.  
this would not be a fair system.....  
PLEASE KEEP NET NEUTRALITY

Please uphold the principle of net neutrality -- we deserve a free and open Internet with strong Title II rules.

Re: In the matter of WC 17-108 Restoring Internet Freedom

Dear Chairman Pai,

Please uphold the principle of net neutrality -- we deserve a free and open Internet with strong Title II rules.  
The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Sincerely,  
Edward Coe

Re: In the matter of WC 17-108 Restoring Internet Freedom

Dear Chairman Pai,

Please uphold the principle of net neutrality -- we deserve a free and open Internet with strong Title II rules.

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Sincerely,  
Elaine Wallace

Re: In the matter of WC 17-108 Restoring Internet Freedom

Dear Chairman Pai,

Please uphold the principle of net neutrality -- we deserve a free and open Internet with strong Title II rules.

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Sincerely,  
David Fulwiler

Please uphold the principle of net neutrality -- we deserve a free and open Internet with strong Title II rules.

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Sincerely,  
Sophia Mcallister

Re: In the matter of WC 17-108 Restoring Internet Freedom

Dear Chairman Pai,

Please uphold the principle of net neutrality -- we deserve a free and open Internet with strong Title II rules.

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Sincerely,  
Diane Jacobson

Re: In the matter of WC 17-108 Restoring Internet Freedom

Dear Chairman Pai,

Please uphold the principle of net neutrality -- we deserve a free and open Internet with strong Title II rules.

I am a small business that relies on the internet to reach customers, and for customers to reach me. If I had to get in line behind a big roll-out over at Amazon, or Verizon, or the like -- my business would be damaged. I cannot compete with the big guys, but I shouldn't have to on a pay-to-play basis. The internet is too much a part of the fabric of our business lives.

If I pick up the phone to call a customer, I don't have to worry that Verizon or ATT or whoever runs my wires is going to slow down my calls while they complete calls for a competitor who has paid for a faster lane. Similarly, I shouldn't have to worry that my communications with customers will be shunted over to a 'slow lane' in some distant slower-moving corner of the internet because I cannot purchase the fast-lane access that AT&T requires.

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. Dear Chairman Pai,

Please uphold the principle of net neutrality -- we deserve a free and open Internet with strong Title II rules.

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Sincerely,  
Scott Shuler

Re: In the matter of WC 17-108 Restoring Internet Freedom

Dear Chairman Pai,

Please uphold the principle of net neutrality -- we deserve a free and open Internet with strong Title II rules.

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Sincerely,  
Jose M Riojas

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Sincerely,  
Lana Lancaster

Re: In the matter of WC 17-108 Restoring Internet Freedom

Dear Chairman Pai,

Please uphold the principle of net neutrality -- we deserve a free and open Internet with strong Title II rules.

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Sincerely,  
Darlene Little

Re: In the matter of WC 17-108 Restoring Internet Freedom

Dear Chairman Pai,

Please uphold the principle of net neutrality -- a free and open Internet with strong Title II rules truly is the 21st century forum for free speech and freedom of assembly.

Net neutrality is vital to citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, for people of any party affiliation, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to police gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Sincerely,  
Penny Costello

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Sincerely,  
Ann Rohrer

Re: In the matter of WC 17-108 Restoring Internet Freedom

Dear Chairman Pai,

Please uphold the principle of net neutrality -- we deserve a free and open Internet with strong Title II rules.

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Sincerely,  
Donald Cole

Re: In the matter of WC 17-108 Restoring Internet Freedom

Dear Chairman Pai,

Please uphold the principle of net neutrality -- we deserve a free and open Internet with strong Title II rules.

Service providers have no right to profit from the content they transmit. They merely offer a delivery mechanism for a system they do not own and content they do not own. Broader band width and faster speeds are some ways they already have to compete in the marketplace. Allowing them to filter content and/or deliver it less reliably is a license to steal. It cannot be legal.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Please uphold the principle of net neutrality -- we deserve a free and open Internet with strong Title II rules.

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Sincerely,  
Wendy Bergsman

Re: In the matter of WC 17-108 Restoring Internet Freedom

Dear Chairman Pai,

Please uphold the principle of net neutrality -- we deserve a free and open Internet with strong Title II rules.

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Sincerely,  
Paul Burton

Re: In the matter of WC 17-108 Restoring Internet Freedom

Dear Chairman Pai,

Please uphold the principle of net neutrality -- we deserve a free and open Internet with strong Title II rules.

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Re: In the matter of WC 17-108 Restoring Internet Freedom

Dear Chairman Pai,

I am writing to voice my support for net neutrality. There should be no fast lanes on the internet. It is clear that a vast majority of citizens supports net neutrality and that only a narrow group of cable companies would benefit from relaxing these rules.

Please uphold the principle of net neutrality -- we deserve a free and open Internet with strong Title II rules.

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

Please uphold the principle of net neutrality -- we deserve a free and open Internet with strong Title II rules.

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Sincerely,  
Dan Martin

Re: In the matter of WC 17-108 Restoring Internet Freedom

Dear Chairman Pai,

Please uphold the principle of net neutrality -- we deserve a free and open Internet with strong Title II rules.

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Sincerely,  
Margaret Bradford

Re: In the matter of WC 17-108 Restoring Internet Freedom

Dear Chairman Pai,

I use the internet every day. As a member of a small co-op for writers i am responsible for maintaining the group's website. To update the site depends on the ability that rests on good connection speeds. The proposal to end net neutrality in favor of the corporate interest throttles everyone else. We as citizens have been told that we own the airwaves. The FCC was given the responsibility to enforce this ideal. Please do your job and keep the internet a resource for all people.

Please uphold the principle of net neutrality -- we deserve a free and open Internet with strong Title II rules.

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. Re: In the matter of WC 17-108 Restoring Internet Freedom

Dear Chairman Pai,

Please uphold the principle of net neutrality -- we deserve a free and open Internet with strong Title II rules.

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Sincerely,  
Robert Bates

Dear Chairman Pai,

Please uphold the principle of net neutrality -- we deserve a free and open Internet with strong Title II rules.

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Sincerely,  
Milton Nogueira

Re: In the matter of WC 17-108 Restoring Internet Freedom

Dear Chairman Pai,

Please uphold the principle of net neutrality -- we deserve a free and open Internet with strong Title II rules.

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Sincerely,  
Kazuye Suyematsu

Please uphold the principle of net neutrality -- we deserve a free and open Internet with strong Title II rules.

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Sincerely,  
Sarah Hardin
