RE: PROPOSED MB 18-184

TO: FCC

I am the President/CEO of Guaranty Media in Baton Rouge, LA, which includes three Class A radio stations, KNXX 104.9 FM in Donaldsonville, LA, WNXX 104.9 FM in Jackson, LA and WBRP 107.3 FM in Baker, LA.

I am in full support of the MMTC and SSR Communications FM Class C43/73.215 proposal to allow eligible Zone II Class A stations to upgrade in power from 6,000 watts to 12,000 watts.

Our broadcasting company has been family owned in Baton Rouge since 1964. Our commitment to our community has never been stronger, and we wake up every day with a servant's heart. We have won numerous awards for our efforts and continue to serve our listeners during hurricanes (too many to name), civic crises (too many to name) and much more.

Please implement the MB 19-184 proposal without delay. Many small broadcasters need this relief.

Sincerely,

A handwritten signature in blue ink, appearing to read 'Flynn D Foster'.

Flynn D Foster
President/CEO
Guaranty Media
