

Regarding MB 18-184

Dear Sir or Madam:

My name is Doug Stannard , and I am the co-owner and General Manager of station KUMX-FM, North Fort Polk, Louisiana, USA.

I am in full support of the MMTC and SSR Communications FM Class C4 / 73.215 proposal to allow eligible Zone II Class A stations to upgrade in power from 6,000 Watts to 12,000 Watts.

KUMX-FM has faithfully served our local communities of Leesville, DeRidder and Fort Polk in West Central Louisiana for over a decade. We support events at our Army Post and have been recognized for our service to the communities we serve.

The proposed upgrade would allow us to fill the gaps in our listening area at the current power.

Please implement the MB 18-184 proposal fully without delay. Many small broadcasters need this relief.

Sincerely,

Douglas M. Stannard, GM
