

**BOYS & GIRLS CLUB**  
OF THE WEST VALLEY

July 22, 2020

Chairman Ajit Pai  
Federal Communications Commission  
Office of the Secretary  
445 12th Street, SW  
Washington, DC 20554

Dear Chairman Pai,

The Boys & Girls Club of the West Valley in Canoga Park, CA expresses its support for Charter Communications in their effort to end two conditions put on them by the FCC four years ago. As a valued partner of ours, we support Charter's ability to grow and thrive the same as all other broadband service companies.

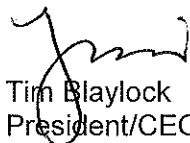

Charter has worked with us for several years, most recently during a Spectrum Internet Assist event with Los Angeles City councilmember Bob Blumenfield last October. During the event Charter awarded 10 Galaxy tablets to our Boys & Girls Club. This was an incredible thing for the children we support at and provides brand new opportunities for kids to access limitless programs and learning tools.

Our connection with the company goes back to the founding of our computer tech center. Several years ago, the company that is now Charter set us up with a computer tech center with free internet service for the first year it was open. Assistance like this goes such a long way in advancing the work we do for children at the Boys & Girls Club of the West Valley.

Boys and Girls Clubs across the U.S. have benefited from partnerships with Charter, and we hope they can continue offering great opportunities like Spectrum Internet Assist. It only seems fair to level the playing field for Charter so they can have the same opportunities to grow as companies similar to them. Please lift the merger restrictions on Charter – those prohibiting data caps and usage-based pricing and requiring settlement-free interconnection – next year at the five-year mark.

Thank you.

Sincerely,

Tim Blaylock  
President/CEO
