Re: *Ex Parte Notice: Accelerating Wireless Broadband Deployment by Removing Barriers to Infrastructure Investment, WT Docket No. 17-79; Accelerating Wireline Broadband Deployment by Removing Barriers to Infrastructure Investment, WC Docket No. 17-84*

Dear Ms. Dortch,

On July 19, 2018, the undersigned from INCOMPAS met with Jay Schwarz, Wireline Advisor, Justin McCuen and Kevin Costelli of Chairman Pai's office, concerning the above-referenced proceeding. INCOMPAS supports adoption by the Commission of the one-touch, make-ready ("OTMR") process for pole attachments proposed in the draft *Third Report and Order*, and the draft *Declaratory Ruling*, in the above referenced proceedings.

The proposed OTMR will speed the process and reduce costs for pole attachments, improving the ability of new broadband providers to enter the market and offer competitive services. The current process of multiple touch and multiple truck-rolls to the pole is inefficient, costly and, as a result, can substantially delay and hinder the expansion of broadband. This is true regardless of how short the time period each existing attachers has to move their equipment since it must be done on a sequential basis, which is one of the many reasons NCTA's ASAP proposal would be ineffective in promoting broadband deployment. We also support the decision, in the draft *Third Report and Order*, that the benefits of OTMR should not be subverted by binding new attachers' choice in contractor by the private agreements of existing attachers or subjecting them to a federally-imposed indemnification provisions.

INCOMPAS also supports the draft *Declaratory Ruling* that state and local moratoria generally violate section 253(a).

Respectfully submitted,

/s/ Karen Reidy
