Description of Planned Network Changes:

This is a revision to the Network Change Notice ATT20160201L.4. The revision was necessary due to outside carriers not being able to meet dates set forth in the previous NCN. **AT&T Texas** has developed a project with the plan to eliminate the Nortel DMS STPs in Midland, Texas. This will require re-homing all the SS7 linksets from the Midland Nortel DMS STPs

(MDLDTXMU07W/TRMNTXTE01W) into the Austin, Texas **(AUSTTXGR57W/AUSTTXTE13W)**

Tekelec STPs. This change will consolidate STPs in LATA (542) to LATA (558). The NEW FSPOI codes are **MDLDTXMU1RW/TRMNTXTE04W**. AT&T will transport the SS7 links from the FSPOI to the new STP location in LATA 558.

Midland, TX - LATA-542

MDLDTXMU07W/TRMNTXTE01W

Point Code - 249-022-000/249-023-000 - Alias 249-090-000

Austin-LATA-558

AUSTTXGR57W/AUSTTXTE13W

Point Code - 249-012-000/249-013-000 - Alias 249-151-251

This project will not be completed prior to March, 2018.

Description of Reasonably Foreseeable Impact of the Planned Changes:

Carriers will need to move their SS7 links and must coordinate the activity with AT&T. AT&T will communicate more details with affected Carriers in 3rd Quarter 2017. It is anticipated that Carriers will have to issue ASRs to connect to the FSPOI in the existing LATA (542) and that **Carriers will not have to transport their SS7 links any further than they presently do.** ASRs will need to be issued prior to the cutovers with the existing FSPOI, and the new Far End CLLI and Point Code. The Carriers will need a technician in their Central Office or STP during the maintenance window on the night of the cutover to make changes in the SS7 routing tables with the new set of point codes shown below. Access Service Requests (ASR) or Local Service Requests (LSR) are due to be submitted on or prior to September 30, 2017.
