RE: Comments – MB 18-184
Class C4

Phone: (404) 636-2257

www.bromocom.com

Dear Sirs:

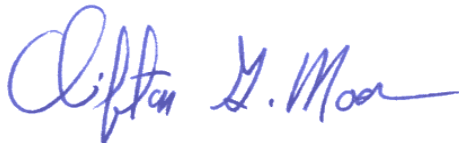

Bromo Communications, a Technical Consulting firm, has been in business for nearly forty years. Our clients are normally small to medium market broadcasters who need technical representation and assistance. Of the clients who have commented to us, most of them want the Class C4 concept approved.

From the very first inkling of Class C4 years ago, I have had clients who wanted to know if their present Class A facilities would be candidates for the upgrade. These aggressive clients remain "all in" for Class C4.

It appears to me that the bulk of opposition to Class C4 is from parties that already operate stations with classes greater than Class C4. Why stifle additional service to the public? Each and every C4 upgrade represents additional service.

Please put Bromo Communications, Inc. on the record in support of the addition of Class C4.

Sincerely,

Clifton G. Moor, President
Bromo Communications, Inc.
