**Implementation Date:** On or after 1st or 2nd Qtr 2017

### Description of Planned Network Changes:

**AT&T Southeast** intends to retire and remove copper feeder facilities in the Knoxville Main WC (KNVLTNMA) due to a Tennessee DOT road project and provide services over a Digital Loop Carrier (DLC) system that will provide pair gain facilities through feeder fiber. The copper feeder cables that will be removed are connected to XBOXs at the following locations in the Knoxville Main wire center:

P 1 INDUSTRIAL PKWY  
F 2401 TEXAS AV  
F 2700 WESTERN AV  
2800 WAVERLY ST  
S 2709 SANDERSON RD  
F 3701 PLEASANT RIDGE RD  
S 4000 PLEASANT RIDGE RD

The XBOX at F 3904 ELDERWOOD RD is to be removed and distribution facilities migrated to the XBOX at F 3701 Pleasant Ridge Rd

### Description of Reasonably Foreseeable Impact of the Planned Changes:

After retirement of the copper facilities, AT&T will cease maintaining these facilities. All services provisioned over these copper facilities are compatible with DLC systems and will be transferred without consequence except for one competitive carrier UNE that AT&T understands has been used to provide DSL service. This carrier will be notified as required and will be required to make alternative arrangements for the DSL service it provides.
