Re: GN Docket No. 15-319, Registration of Environmental Sensing Capability Sensors

Dear Ms. Dortch

CommScope confirms that jointly with Google, we submitted two sets of ESC Sensor registrations labeled Phase 1 and Phases 2-4 to the FCC for consideration on March 26, 2019 and April 15, 2019 respectively. These submissions followed the procedural requirements described in DA 18-1054, "*Wireless Telecommunications Bureau and Office Of Engineering And Technology Establish Procedure For Registering Environmental Sensing Capability Sensors.*" Per this procedure, the ESC sensor registrations were submitted to the [ESC.Sensor.Info@fcc.gov](mailto:ESC.Sensor.Info@fcc.gov) mailbox.

The registrations included ESC sensor coverage for the following 47 DPAs, providing full coverage for all coastal DPAs in the lower forty-eight US states:

East 1	East 11	East 21	West 2	West 12
East 2	East 12	East 22	West 3	West 13
East 3	East 13	East 23	West 4	West 14
East 4	East 14	East 24	West 5	San Diego Port
East 5	East 15	East 25	West 6	Alameda
East 6	East 16	East 26	West 7	Long Beach
East 7	East 17	Norfolk Port	West 8	Bremerton Everett
East 8	East 18	Mayport	West 9	
East 9	East 19	Pascagoula Port	West 10	
East 10	East 20	West 1	West 11	

In each submission CommScope and Google requested confidential treatment of the ESC sensor site installation data pursuant to 47 CFR 0.459. The information we requested to keep confidential included the location and configuration of the ESC sensors. Because ESC services will be provided in a competitive environment, disclosure of this sensitive and proprietary information, which neither CommScope nor Google have made publicly available, could result in competitive harm to CommScope and/or Google.

Respectfully Submitted,

/s/ H. Mark Gibson
