

May 30, 2018

The Honorable Ajit Pai  
Chairman  
Federal Communications Commission  
445 12th Street, SW  
Washington, DC 20554

Dear Chairman Pai:

We write today to urge you to finalize expeditiously the pending Notice of Proposed Rulemaking that seeks to modify the license and technical rules for operations in the 3.5 GHz Citizens Broadband Radio Service (CBRS) band.<sup>1</sup> The Federal Communications Commission under your leadership appropriately opened a rulemaking last year to explore ways of ensuring this valuable swath of spectrum is put to its highest and best use. It is imperative that the FCC act quickly to conclude this proceeding and open the band for innovative technologies to serve American consumers.

As the FCC is aware, wireless data usage is skyrocketing. In 2016, U.S. consumers used a record 13.7 trillion megabytes of mobile data, amounting to 35 times the volume of traffic in 2010. By the end of this year, smartphone data is expected to surpass fixed broadband use for the first time. Data usage trends are expected to continue upward as our nation deploys the next generation of wireless, known as 5G. With 5G, consumers and businesses can expect higher speeds and more responsive networks; connecting nearly every aspect of our lives, adding billions to our economy and supporting millions of new jobs.

Mid-band spectrum such as the 3.5 GHz band is quickly becoming critical to the portfolio of frequencies needed to support 5G connectivity and bring broadband services to more people across the U.S., including those living in rural areas. Countries across the globe are targeting mid-band spectrum because it can meet both the coverage and capacity requirements needed to bolster 4G LTE and support next-generation networks. Unfortunately, recent reports indicate that the U.S. is falling behind in 5G-readiness as other nations modernize their infrastructure policies and make more spectrum available for 5G use. Indeed, by the end of this year the United States will rank

sixth out of the ten most 5G-ready nations in mid-band spectrum availability, joining only two other countries that have not announced plans to allocate mid-band spectrum on an exclusive basis to mobile broadband by the end of 2020.<sup>2</sup>

Given the international focus and potential for global harmonization in this band to promote investment and innovation, it is imperative that the FCC quickly make available additional mid-band spectrum – and the 3.5 GHz band in particular – for wireless use. We therefore urge you to finalize promptly the rules in the CBRS proceeding so that innovative products and services can be deployed in this spectrum to the benefit of American businesses and communities.

Thank you for your attention to this matter and for your ongoing efforts to ensure next-generation broadband connectivity is available to consumers across the United States.

Sincerely,

FEDERAL COMMUNICATIONS COMMISSION  
WASHINGTON

OFFICE OF  
THE CHAIRMAN

July 23, 2018

The Honorable Billy Long  
U.S. House of Representatives  
2454 Rayburn House Office Building  
Washington, D.C. 20515

Dear Congressman Long:

Thank you for your letter urging the FCC to expeditiously finalize the license and technical rules for operations in the 3.5 GHz Citizens Broadband Radio Service band. Your views are important and will be entered into the record of the proceeding and considered as part of the Commission's review.

Shortly after becoming Chairman in January 2017, I asked Commissioner O'Rielly to take the lead in examining whether the Commission's 3.5 GHz rules struck the right balance for encouraging investment and innovation in the band. Thanks in part to his hard work, we moved quickly to promote license value and investment in this band through a Notice of Proposed Rulemaking. As Commissioner O'Rielly noted earlier this month, he has provided recommendations for how to proceed with this rulemaking—and I understand that his office is now working with agency staff to wrap up this rulemaking in the coming months.

I appreciate your interest in this matter. Please let me know if I can be of any further assistance.

Sincerely,

  
Ajit V. Pai
