

Congress of the United States  
Washington, DC 20515

Received & Inspected

MAY 17 2018

394

FCC Mail Room

May 15, 2018

The Honorable Ajit Pai  
Federal Communications Commission  
445 12<sup>th</sup> Street SW  
Washington, DC 20554

Dear Chairman Pai:

We thank the Federal Communications Commission (FCC) for its recent Order addressing certain High-Cost Universal Service Fund (USF) budget shortfalls. The recent Order is an essential near-term step in the right direction, but we encourage the FCC to adopt longer-term USF budget solutions that will ensure rural Americans the opportunity to obtain voice and broadband services on a basis that is reasonably comparable to what other Americans enjoy.

In multiple letters, Congress has expressed broad support for addressing High-Cost program shortfalls. In May 2017, nearly 160 Members of Congress wrote to the FCC, expressing concern about the impact of insufficient USF resources on rural consumers. In October 2017, nearly 75 Members of Congress asked the FCC to immediately address the budget shortfall and continue collecting the same USF budget levels for the High-Cost program pending development of a longer-term solution.

The FCC's recent Order approving an infusion of funds into the USF is greatly welcomed, but it also represents a recognition of, and an incomplete salve for, a more significant problem – the fact that the High-Cost USF program has been and remains insufficient (notwithstanding the recent injection of support). This persistent insufficiency is affecting the ability of smaller rural broadband providers to effectively deliver broadband services in the most rural areas of America. For example, we understand the FCC's cost model for smaller operators is still not funded at the levels as designed, while those smaller carriers that do not receive model support may face even steeper support cuts than before when the program's new "fiscal year" takes effect on July 1. For all the work just undertaken, these recurring budget shortfalls will yet again translate to lower speeds, more unserved locations, and higher prices for rural consumers and businesses.

To be clear, we greatly appreciate the steps taken by the FCC thus far to address such concerns. However, until longer-term budget solutions are addressed as well, many smaller operators will remain unable to offer high quality, affordable broadband to consumers across rural America. For these reasons, we encourage the FCC to act as soon as possible pursuant to the notice of proposed rulemaking included with the order to provide support that is both sufficient and predictable on a longer-term basis as mandated by statute.

Thank you for your consideration. We share your goal of eliminating the digital divide and look forward to working with you to ensure rural American consumers and businesses have access to quality, affordable broadband.

OFFICE OF  
THE CHAIRMAN

FEDERAL COMMUNICATIONS COMMISSION  
WASHINGTON

July 23, 2018

The Honorable Kevin Cramer  
U.S. House of Representatives  
1717 Longworth House Office Building  
Washington, D.C. 20515

Dear Congressman Cramer:

Thank you for your letter on the importance of high-speed broadband access to rural Americans. I wholeheartedly agree that closing the digital divide is our foremost mission as an agency, and I appreciate your recognition of the work the Commission completed earlier this year to foster further deployment in the most remote corners of our country.

In March, the Commission devoted over \$500 million to increasing deployment by small carriers in rural communities—a reversal of the prior Administration’s policy of punishing these carriers and instead of rewarding them for providing high-speed, high-quality services. As part of that action, we also doubled down on our model-based support for hard-to-serve communities, increasing the funding for carriers willing to build out in an efficient manner. In April, we then moved forward by proposing to eliminate many of the legacy burdens for small, model-based carriers serving businesses in rural America—burdens that unnecessarily divert funding from build-out to paperwork. And in June, we eliminated a rule that penalized small rural carriers with extra Universal Service fees whenever they offered broadband.

Nonetheless, I agree with you that more must be done if we’re going to extend digital opportunity to all Americans. That’s why in March the Commission issued a detailed Notice of Proposed Rulemaking that explores how to ensure sufficient and predictable support over the long term. I agree with you that we must take a close look at expanding access to and funding for our small-carrier cost model and that we must end the unpredictable cuts to carriers not on the model. Increased funding will boost broadband deployment in rural America, and additional reforms will put our high-cost system on a more efficient path so that every American can benefit from the digital revolution. Commission staff is carefully reviewing the record in the proceeding, and I aim to circulate an order ensuring adequate and efficient funding for rural broadband deployment later this year.

I appreciate your interest in this matter. Please let me know if I can be of any further assistance.

Sincerely,

  
Ajit V. Pai

The Honorable Mo Brooks  
U.S. House of Representatives  
2400 Rayburn House Office Building  
Washington, D.C. 20515

Dear Congressman Brooks:

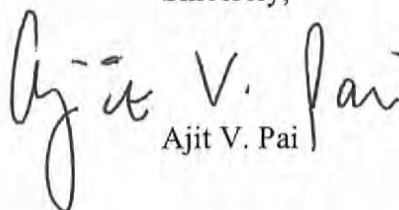

Thank you for your letter on the importance of high-speed broadband access to rural Americans. I wholeheartedly agree that closing the digital divide is our foremost mission as an agency, and I appreciate your recognition of the work the Commission completed earlier this year to foster further deployment in the most remote corners of our country.

In March, the Commission devoted over \$500 million to increasing deployment by small carriers in rural communities—a reversal of the prior Administration’s policy of punishing these carriers and instead of rewarding them for providing high-speed, high-quality services. As part of that action, we also doubled down on our model-based support for hard-to-serve communities, increasing the funding for carriers willing to build out in an efficient manner. In April, we then moved forward by proposing to eliminate many of the legacy burdens for small, model-based carriers serving businesses in rural America—burdens that unnecessarily divert funding from build-out to paperwork. And in June, we eliminated a rule that penalized small rural carriers with extra Universal Service fees whenever they offered broadband.

Nonetheless, I agree with you that more must be done if we’re going to extend digital opportunity to all Americans. That’s why in March the Commission issued a detailed Notice of Proposed Rulemaking that explores how to ensure sufficient and predictable support over the long term. I agree with you that we must take a close look at expanding access to and funding for our small-carrier cost model and that we must end the unpredictable cuts to carriers not on the model. Increased funding will boost broadband deployment in rural America, and additional reforms will put our high-cost system on a more efficient path so that every American can benefit from the digital revolution. Commission staff is carefully reviewing the record in the proceeding, and I aim to circulate an order ensuring adequate and efficient funding for rural broadband deployment later this year.

I appreciate your interest in this matter. Please let me know if I can be of any further assistance.

Sincerely,

  
Ajit V. Pai

And in June, we eliminated a rule that penalized small rural carriers with extra Universal Service fees whenever they offered broadband.

Nonetheless, I agree with you that more must be done if we’re going to extend digital opportunity to all Americans. That’s why in March the Commission issued a detailed Notice of Proposed Rulemaking that explores how to ensure sufficient and predictable support over the long term. I agree with you that we must take a close look at expanding access to and funding for our small-carrier cost model and that we must end the unpredictable cuts to carriers not on the model. Increased funding will boost broadband deployment in rural America, and additional reforms will put our high-cost system on a more efficient path so that every American can benefit from the digital revolution. Commission staff is carefully reviewing the record in the proceeding, and I aim to circulate an order ensuring adequate and efficient funding for rural broadband deployment later this year.

I appreciate your interest in this matter. Please let me know if I can be of any further assistance.

Sincerely,

  
Ajit V. Pai

WASHINGTON

July 23, 2018

The Honorable Kurt Schrader  
U.S. House of Representatives  
2431 Rayburn House Office Building  
Washington, D.C. 20515

Dear Congressman Schrader:

Thank you for your letter on the importance of high-speed broadband access to rural Americans. I wholeheartedly agree that closing the digital divide is our foremost mission as an agency, and I appreciate your recognition of the work the Commission completed earlier this year to foster further deployment in the most remote corners of our country.

In March, the Commission devoted over \$500 million to increasing deployment by small carriers in rural communities—a reversal of the prior Administration’s policy of punishing these carriers and instead of rewarding them for providing high-speed, high-quality services. As part of that action, we also doubled down on our model-based support for hard-to-serve communities, increasing the funding for carriers willing to build out in an efficient manner. In April, we then moved forward by proposing to eliminate many of the legacy burdens for small, model-based carriers serving businesses in rural America—burdens that unnecessarily divert funding from build-out to paperwork. And in June, we eliminated a rule that penalized small rural carriers with extra Universal Service fees whenever they offered broadband.

Nonetheless, I agree with you that more must be done if we’re going to extend digital opportunity to all Americans. That’s why in March the Commission issued a detailed Notice of Proposed Rulemaking that explores how to ensure sufficient and predictable support over the long term. I agree with you that we must take a close look at expanding access to and funding for our small-carrier cost model and that we must end the unpredictable cuts to carriers not on the model. Increased funding will boost broadband deployment in rural America, and additional reforms will put our high-cost system on a more efficient path so that every American can benefit from the digital revolution. Commission staff is carefully reviewing the record in the proceeding, and I aim to circulate an order ensuring adequate and efficient funding for rural broadband deployment later this year.

Washington, D.C. 20515

Dear Congressman Bishop:

Thank you for your letter on the importance of high-speed broadband access to rural Americans. I wholeheartedly agree that closing the digital divide is our foremost mission as an agency, and I appreciate your recognition of the work the Commission completed earlier this year to foster further deployment in the most remote corners of our country.

In March, the Commission devoted over \$500 million to increasing deployment by small carriers in rural communities—a reversal of the prior Administration's policy of punishing these carriers and instead of rewarding them for providing high-speed, high-quality services. As part of that action, we also doubled down on our model-based support for hard-to-serve communities, increasing the funding for carriers willing to build out in an efficient manner. In April, we then moved forward by proposing to eliminate many of the legacy burdens for small, model-based carriers serving businesses in rural America—burdens that unnecessarily divert funding from build-out to paperwork. And in June, we eliminated a rule that penalized small rural carriers with extra Universal Service fees whenever they offered broadband.

Nonetheless, I agree with you that more must be done if we're going to extend digital opportunity to all Americans. That's why in March the Commission issued a detailed Notice of Proposed Rulemaking that explores how to ensure sufficient and predictable support over the long term. I agree with you that we must take a close look at expanding access to and funding for our small-carrier cost model and that we must end the unpredictable cuts to carriers not on the model. Increased funding will boost broadband deployment in rural America, and additional reforms will put our high-cost system on a more efficient path so that every American can benefit from the digital revolution. Commission staff is carefully reviewing the record in the proceeding, and I aim to circulate an order ensuring adequate and efficient funding for rural broadband deployment later this year.

I appreciate your interest in this matter. Please let me know if I can be of any further assistance.

Sincerely,

A handwritten signature in black ink that reads "Ajit V. Pai". The signature is fluid and cursive, with the first name "Ajit" being the most prominent part.

As part of that action, we also doubled down on our model-based support for hard-to-serve communities, increasing the funding for carriers willing to build out in an efficient manner. In April, we then moved forward by proposing to eliminate many of the legacy burdens for small, model-based carriers serving businesses in rural America—burdens that unnecessarily divert funding from build-out to paperwork. And in June, we eliminated a rule that penalized small rural carriers with extra Universal Service fees whenever they offered broadband.

Nonetheless, I agree with you that more must be done if we’re going to extend digital opportunity to all Americans. That’s why in March the Commission issued a detailed Notice of Proposed Rulemaking that explores how to ensure sufficient and predictable support over the long term. I agree with you that we must take a close look at expanding access to and funding for our small-carrier cost model and that we must end the unpredictable cuts to carriers not on the model. Increased funding will boost broadband deployment in rural America, and additional reforms will put our high-cost system on a more efficient path so that every American can benefit from the digital revolution. Commission staff is carefully reviewing the record in the proceeding, and I aim to circulate an order ensuring adequate and efficient funding for rural broadband deployment later this year.

I appreciate your interest in this matter. Please let me know if I can be of any further assistance.

Sincerely,

  
Ajit V. Pai

THE CHAIRMAN

FEDERAL COMMUNICATIONS COMMISSION  
WASHINGTON

July 23, 2018

The Honorable Ron Estes  
U.S. House of Representatives  
2452 Rayburn House Office Building  
Washington, D.C. 20515

Dear Congressman Estes:

Thank you for your letter on the importance of high-speed broadband access to rural Americans. I wholeheartedly agree that closing the digital divide is our foremost mission as an agency, and I appreciate your recognition of the work the Commission completed earlier this year to foster further deployment in the most remote corners of our country.

In March, the Commission devoted over \$500 million to increasing deployment by small carriers in rural communities—a reversal of the prior Administration's policy of punishing these carriers and instead of rewarding them for providing high-speed, high-quality services. As part of that action, we also doubled down on our model-based support for hard-to-serve communities, increasing the funding for carriers willing to build out in an efficient manner. In April, we then moved forward by proposing to eliminate many of the legacy burdens for small, model-based carriers serving businesses in rural America—burdens that unnecessarily divert funding from build-out to paperwork. And in June, we eliminated a rule that penalized small rural carriers with extra Universal Service fees whenever they offered broadband.

Nonetheless, I agree with you that more must be done if we're going to extend digital opportunity to all Americans. That's why in March the Commission issued a detailed Notice of Proposed Rulemaking that explores how to ensure sufficient and predictable support over the long term. I agree with you that we must take a close look at expanding access to and funding for our small-carrier cost model and that we must end the unpredictable cuts to carriers not on the model. Increased funding will boost broadband deployment in rural America, and additional reforms will put our high-cost system on a more efficient path so that every American can benefit from the digital revolution. And in June, we eliminated a rule that penalized small rural carriers with extra Universal Service fees whenever they offered broadband.

Nonetheless, I agree with you that more must be done if we’re going to extend digital opportunity to all Americans. That’s why in March the Commission issued a detailed Notice of Proposed Rulemaking that explores how to ensure sufficient and predictable support over the long term. I agree with you that we must take a close look at expanding access to and funding for our small-carrier cost model and that we must end the unpredictable cuts to carriers not on the model. Increased funding will boost broadband deployment in rural America, and additional reforms will put our high-cost system on a more efficient path so that every American can benefit from the digital revolution. Commission staff is carefully reviewing the record in the proceeding, and I aim to circulate an order ensuring adequate and efficient funding for rural broadband deployment later this year.

I appreciate your interest in this matter. Please let me know if I can be of any further assistance.

Sincerely,

  
Ajit V. Pai

THE CHAIRMAN

FEDERAL COMMUNICATIONS COMMISSION  
WASHINGTON

July 23, 2018

The Honorable Steve Russell  
U.S. House of Representatives  
128 Cannon House Office Building  
Washington, D.C. 20515

Dear Congressman Russell:

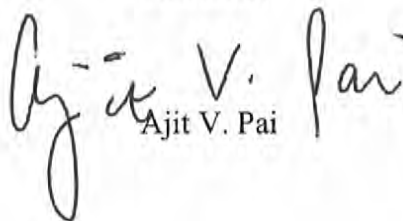

Thank you for your letter on the importance of high-speed broadband access to rural Americans. I wholeheartedly agree that closing the digital divide is our foremost mission as an agency, and I appreciate your recognition of the work the Commission completed earlier this year to foster further deployment in the most remote corners of our country.

In March, the Commission devoted over \$500 million to increasing deployment by small carriers in rural communities—a reversal of the prior Administration's policy of punishing these carriers and instead of rewarding them for providing high-speed, high-quality services. As part of that action, we also doubled down on our model-based support for hard-to-serve communities, increasing the funding for carriers willing to build out in an efficient manner. In April, we then moved forward by proposing to eliminate many of the legacy burdens for small, model-based carriers serving businesses in rural America—burdens that unnecessarily divert funding from build-out to paperwork. And in June, we eliminated a rule that penalized small rural carriers with extra Universal Service fees whenever they offered broadband.

Nonetheless, I agree with you that more must be done if we're going to extend digital opportunity to all Americans. That's why in March the Commission issued a detailed Notice of Proposed Rulemaking that explores how to ensure sufficient and predictable support over the long term. I agree with you that we must take a close look at expanding access to and funding for our small-carrier cost model and that we must end the unpredictable cuts to carriers not on the model. Increased funding will boost broadband deployment in rural America, and additional reforms will put our high-cost system on a more efficient path so that every American can benefit from the digital revolution. I agree with you that we must take a close look at expanding access to and funding for our small-carrier cost model and that we must end the unpredictable cuts to carriers not on the model. Increased funding will boost broadband deployment in rural America, and additional reforms will put our high-cost system on a more efficient path so that every American can benefit from the digital revolution. Commission staff is carefully reviewing the record in the proceeding, and I aim to circulate an order ensuring adequate and efficient funding for rural broadband deployment later this year.

I appreciate your interest in this matter. Please let me know if I can be of any further assistance.

Sincerely,

  
Ajit V. Pai

FEDERAL COMMUNICATIONS COMMISSION

OFFICE OF  
THE CHAIRMAN

July 23, 2018

The Honorable Rodney Davis  
U.S. House of Representatives  
1740 Longworth House Office Building  
Washington, D.C. 20515

Dear Congressman Davis:

Thank you for your letter on the importance of high-speed broadband access to rural Americans. I wholeheartedly agree that closing the digital divide is our foremost mission as an agency, and I appreciate your recognition of the work the Commission completed earlier this year to foster further deployment in the most remote corners of our country.

In March, the Commission devoted over \$500 million to increasing deployment by small carriers in rural communities—a reversal of the prior Administration's policy of punishing these carriers and instead of rewarding them for providing high-speed, high-quality services. As part of that action, we also doubled down on our model-based support for hard-to-serve communities, increasing the funding for carriers willing to build out in an efficient manner. In April, we then moved forward by proposing to eliminate many of the legacy burdens for small, model-based carriers serving businesses in rural America—burdens that unnecessarily divert funding from build-out to paperwork. And in June, we eliminated a rule that penalized small rural carriers with extra Universal Service fees whenever they offered broadband.

Nonetheless, I agree with you that more must be done if we're going to extend digital opportunity to all Americans. That's why in March the Commission issued a detailed Notice of Proposed Rulemaking that explores how to ensure sufficient and predictable support over the long term. I agree with you that we must take a close look at expanding access to and funding for our small-carrier cost model and that we must end the unpredictable cuts to carriers not on the model. Increased funding will boost broadband deployment in rural America, and additional reforms will put our high-cost system on a more efficient path so that every American can benefit from the digital revolution. Commission staff is carefully reviewing the record in the proceeding, and I aim to circulate an order ensuring adequate and efficient funding for rural broadband deployment later this year.

I appreciate your interest in this matter. Please let me know if I can be of any further assistance.

Thank you for your letter on the importance of high-speed broadband access to rural Americans. I wholeheartedly agree that closing the digital divide is our foremost mission as an agency, and I appreciate your recognition of the work the Commission completed earlier this year to foster further deployment in the most remote corners of our country.

In March, the Commission devoted over \$500 million to increasing deployment by small carriers in rural communities—a reversal of the prior Administration's policy of punishing these carriers and instead of rewarding them for providing high-speed, high-quality services. As part of that action, we also doubled down on our model-based support for hard-to-serve communities, increasing the funding for carriers willing to build out in an efficient manner. In April, we then moved forward by proposing to eliminate many of the legacy burdens for small, model-based carriers serving businesses in rural America—burdens that unnecessarily divert funding from build-out to paperwork. And in June, we eliminated a rule that penalized small rural carriers with extra Universal Service fees whenever they offered broadband.

Nonetheless, I agree with you that more must be done if we're going to extend digital opportunity to all Americans. That's why in March the Commission issued a detailed Notice of Proposed Rulemaking that explores how to ensure sufficient and predictable support over the long term. I agree with you that we must take a close look at expanding access to and funding for our small-carrier cost model and that we must end the unpredictable cuts to carriers not on the model. Increased funding will boost broadband deployment in rural America, and additional reforms will put our high-cost system on a more efficient path so that every American can benefit from the digital revolution. Commission staff is carefully reviewing the record in the proceeding, and I aim to circulate an order ensuring adequate and efficient funding for rural broadband deployment later this year.

I appreciate your interest in this matter. Please let me know if I can be of any further assistance.

Sincerely,

  
Ajit V. Pai

As part of that action, we also doubled down on our model-based support for hard-to-serve communities, increasing the funding for carriers willing to build out in an efficient manner. In April, we then moved forward by proposing to eliminate many of the legacy burdens for small, model-based carriers serving businesses in rural America—burdens that unnecessarily divert funding from build-out to paperwork. And in June, we eliminated a rule that penalized small rural carriers with extra Universal Service fees whenever they offered broadband.

Nonetheless, I agree with you that more must be done if we’re going to extend digital opportunity to all Americans. That’s why in March the Commission issued a detailed Notice of Proposed Rulemaking that explores how to ensure sufficient and predictable support over the long term. I agree with you that we must take a close look at expanding access to and funding for our small-carrier cost model and that we must end the unpredictable cuts to carriers not on the model. Increased funding will boost broadband deployment in rural America, and additional reforms will put our high-cost system on a more efficient path so that every American can benefit from the digital revolution. Commission staff is carefully reviewing the record in the proceeding, and I aim to circulate an order ensuring adequate and efficient funding for rural broadband deployment later this year.

I appreciate your interest in this matter. Please let me know if I can be of any further assistance.

Sincerely,

  
Ajit V. Pai

WASHINGTON

July 23, 2018

The Honorable John R. Curtis  
U.S. House of Representatives  
2236 Rayburn House Office Building  
Washington, D.C. 20515

Dear Congressman Curtis:

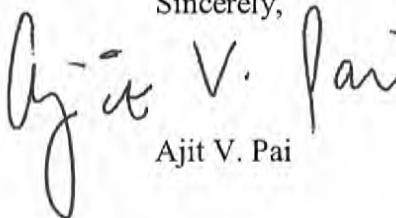

Thank you for your letter on the importance of high-speed broadband access to rural Americans. I wholeheartedly agree that closing the digital divide is our foremost mission as an agency, and I appreciate your recognition of the work the Commission completed earlier this year to foster further deployment in the most remote corners of our country.

In March, the Commission devoted over \$500 million to increasing deployment by small carriers in rural communities—a reversal of the prior Administration’s policy of punishing these carriers and instead of rewarding them for providing high-speed, high-quality services. As part of that action, we also doubled down on our model-based support for hard-to-serve communities, increasing the funding for carriers willing to build out in an efficient manner. In April, we then moved forward by proposing to eliminate many of the legacy burdens for small, model-based carriers serving businesses in rural America—burdens that unnecessarily divert funding from build-out to paperwork. And in June, we eliminated a rule that penalized small rural carriers with extra Universal Service fees whenever they offered broadband.

Nonetheless, I agree with you that more must be done if we’re going to extend digital opportunity to all Americans. That’s why in March the Commission issued a detailed Notice of Proposed Rulemaking that explores how to ensure sufficient and predictable support over the long term. I agree with you that we must take a close look at expanding access to and funding for our small-carrier cost model and that we must end the unpredictable cuts to carriers not on the model.
