Functionality in Emergency Situations

ITS Telecommunications Systems, Inc., DBA, ITS Telecom, certifies that our company is compliant in emergency situations as set forth in the Code of Federal Regulations. We have a Disaster and Hurricane Preparedness Plan in place and update it periodically as needed. ITS Telecom has employees that attend yearly emergency scenario training sessions with both the Florida State Emergency Operations Department and the County Emergency Operations Department. There are ongoing communications with these Emergency Operations Departments when potential emergencies are identified. We have an IT Steering Committee that meets several times a year to review our Emergency Preparedness Policies.

ITS Telecom's central office is designed to withstand power failures through the use of batteries and backup generators. We also have backup generators for our remotes which will keep running until commercial power is restored as long as fuel is available. The IT Department and the Outside Plant Department perform scheduled routine maintenance of our batteries and generators. Our IT Department monitors our network 24/7/365 which ensures timely responses when a problem arises. Our serving area has network redundancy that provides an alternate route when needed.
