October 30, 1992

Office of the Secretary
Federal Communications Commission
Washington, D.C. 20554

The communications industry needs a more accessible and available testing system. Please consider the following suggestions and recommendations while reviewing Docket FO 92-206. I encourage the Commission to do the following:

1. Allow multiple private non-profit entities to perform testing that is practical and continuously reviewed for obsolescence of content.
2. Designate NARTE, NABER, and SBE as the testing entities, since they are representative of the industry and have in place successful working programs that were designed to the intent of Docket 86-322.
3. Allow these organizations to work as a group to develop a common standard.
4. Recognize the importance of reasonable certification credentials in the telecommunications workplace.

Sincerely,

Nancy Stewart
Outside Plant Engineering Mgr.
