FILE

TO: MASS MEDIA BUREAU (Policy & Rules) STOP 1800D5

COMMENTS OF Y95 RADIO

Y95 Radio, licensee of Station KCXY, **by** its attorney, supports the allotment of Channel 237C1 to East Camden AR, and modification of the license for KCXY accordingly, as proposed in the Notice of Proposed Rulemaking (DA 92-1210). The change in community and increase in power would provide two distinct benefits to the public interest.

First, increases in power by existing stations result in greater service to the public. The Commission said:

We presume that permitting increases in operating power, as we have done in countless proceedings, is in the public interest.

(Goldendale WA, DA 92-1259, Mass Media Bureau) In our case, KCXY operating as a Class C1 station will serve 137,855 more persons with primary service, in an area of 14,791 sq. km, than does the present KCXY operation. This is shown in the Technical Exhibit of the KCXY Petition, p. 6 (March 20, 1992). Such a large increase in population provided with a new reception service is a major public interest benefit.

Secondly, Y95 Radio will provide a local transmission service to East Camden, which now has none. East Camden is

List A B C D E

0 F 4

an incorporated community, with its own post office, government, businesses and organizations. KCXY, when licensed as an East Camden station, will provide increased coverage of East Camden events and organizations. The attached exhibit on Public Interest Benefits lists specific programs and announcements which KCXY will carry to meet local needs for information and expression. Y95 Radio will fully meet its obligation to provide a local transmission outlet for East Camden.

After KCXY is modified, Camden will still have ample local transmission services. AM Stations KAMD and KJWH (both fulltime) and FM Station KWEH are all Camden stations. There is no lack of Camden stations. (Channel 283 is also allotted to Camden; it will, when activated, provide a fourth local service.)

In sum, the allotment of East Camden's first radio station will better comply with Section 307(b) of the Communications Act than does the present allotment, which gives Camden five stations/allotments.

Channel 237C1 should be allotted to East Camden, and the necessary channel substitutions should be made at Stamps AR and Minden LA.

Its Attorney

PUBLIC INTEREST BENEFITS FOR EAST CAMDEN, ARKANSAS  
PROPOSAL FROM KCXY CAMDEN, ARKANSAS

KCXY proposes to provide the following services to East Camden, Arkansas if a change in community license is granted.

KCXY will report on news worthy events including but not limited to the following:

The East Camden City Board Meetings. These meetings are held monthly and KCXY will try to have at least one station representative at every meeting.

The Harmony Grove (East Camden) School District Meetings. Meetings are held twice each month during school year. KCXY will report on topics of general interest that are discussed in the meeting. KCXY also will report on or publicize other school events such as sports, lunch menus, band concerts and club events.

Southern Arkansas University Tech. SAU Tech located at East Camden is a technical university specializing in robotics and factory automation. KCXY will report on or publicize events at SAU Tech including "HI-Tech Week", a week of robotic and automation demonstrations open to the public. SAU Tech provides many other services of interest to all of South Arkansas that an upgraded KCXY could better serve.

Highland Industrial Park. This large industrial park is located near East Camden and is the major employer of Ouachita and Calhoun counties. As jobs and the expansion or closure of industries are a main concern to the community, KCXY will report on news events from the industrial park.

KCXY will also provide public service time, air requested bulletins and cover news events from the East Camden Police Department and the East Camden Volunteer Fire Department.

CERTIFICATE OF SERVICE
