Re: MB Docket No. 17-105

Dear Ms. Dortch:

Please be advised that CRSEM, LLC, an Illinois limited liability company has reviewed the Comments of Shainis & Peltzman, Chartered which were filed in the above-referenced Docket. We are also familiar with the Petition for Rulemaking filed by Geo-Broadcast Solutions, RM No. 11659, which is referenced in the Shainis & Peltzman Comments.

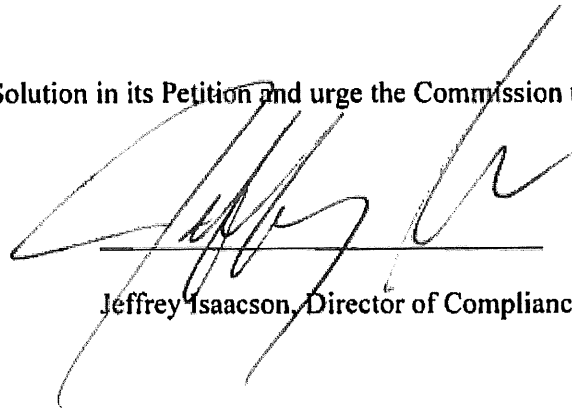

CRSEM on its behalf and of the few dozen charities we represent, urges the Commission to take whatever steps it deems appropriate to expeditiously modify Section 74.1231(i) of the Commission's rules, allowing for origination of programming on booster facilities. As explained in the Shainis & Peltzman Comments, the public interest benefits are significant. CRSEM believes that adoption of this minor rule change will allow for a much needed boost for the radio industry, the economy, and not least, the public welfare.

Additionally we represent dozens of Chambers of Commerce in and around Chicagoland as well as a number of other states we conduct events in and strongly feel that the economic benefit to the radio industry as well as the sponsors, audience will lead to job creation and ability of more small businesses being able to afford radio advertising. We see this is all positive and

a world of possibilities

event production • logistical management • marketing services • public relations • graphic design
sponsorship sales • trade show services • concert production • sporting events • street festivals • talent buying

we wholeheartedly support Geo Broadcast Solution in its Petition and urge the Commission to support this proposition.
