Wireless E911 Location Accuracy Requirements) PS Docket No. 07-114

Limitless Mobile, LLC E911 Location Accuracy 36 Month Progress Report

Limitless Mobile ("Limitless"), pursuant to Section 20.18(i)(4)(ii) of the Federal Communications Commission's ("FCC" or "Commission") rules, hereby submits its 36 month progress report.

Limitless is a small non-nationwide CMRS carrier providing service in Pennsylvania. Limitless does not provide service in any of the top 50 CMAs. Limitless is in compliance with the location accuracy requirement of Section 20.18(i)(2)(i)(B)(2) of the FCC's rules. Limitless relies on a handset-based solution for the provision of enhanced 911 ("E911") location accuracy data to requesting public safety answering points ("PSAPs"). The ability to offer GPS-enabled handsets has allowed Limitless to provide the required level of accuracy. The majority of Limitless' retail subscribers utilize GPS-enabled handsets, and Limitless expects its level of accuracy to improve as this penetration rate increases and as new handsets are introduced into the market, and that it will meet all applicable benchmarks. Limitless will make available to PSAPs uncompensated barometric pressure data for any 911 call placed from any handset offered by Limitless that has the capability to deliver barometric sensor data. Because Limitless does not provide service in any of the top 50 CMAs, it is not required to provide vertical z-axis location information.
