

Date: August 4, 2017
From: Door County Broadband, LLC

We moved to Fish Creek Wisconsin 6 years ago. When we purchased our home, we asked our Realtor 3 times if there was high speed internet available. She assured us, via the county website that there were many high speed options. After closing and moving into our home, we found out there were NONE. We lived for over a year on our mifi and huge monthly bills. We called back the local WISP and asked again why we couldn't have service. They said it was too hard and expensive. Long story short, it was either move or **become a broadband company**. We decided to remain in Fish Creek and subsequently purchased the assets of the two local WISP's in 2014 and founded **Door County Broadband**. We have worked tirelessly to expand the internet throughout Door County Wisconsin since. We have tripled the subscriber base in that time and continue to grow daily, with recent expansion into Kewaunee County, Wisconsin.

We recently deployed a LTE for WISP's and are looking at this platform to help the rural communities of both Door and Kewaunee County. If this is given to the cellular industry instead, through an auction, we will be locked out of taking care of our ever growing rural customer base. That would be a shame as this is also a resort community with millions of visitors annually...with most asking for internet access. That is what WE do. **Please don't shut the door on this much needed platform expansion for the WISP industry.**
