

To Whom it May Concern

I am a retired photographer living in Brooklyn. Seven years ago I was diagnosed with a rare neurological disease which has caused me to lose most of my hearing. I now have a Cochlear Implant which restored some hearing but not enough to use a telephone. InnoCaption has been a life savor for me as conversations are printed out in real time on my cell phone screen. Without it I cannot use my phone and am very isolated from friends, family and the outside world. I depend on it. PLEASE DO NOT TAKE IT AWAY.

Sincerely,

Bill Thompson
