

My name is Diana Mrochek and I'm 59 years old. I was diagnosed with a genetic hearing loss at the age of 23 and has progressively grown worse with time. I have been using the Innocaption app for about 2 years now and it's been a life saver.

I am an Administrative Assistant in a medical office and I very much depend on this app to do my job. I struggle to hear on the phone so it has made the world of difference to me to be able to see the captions. I could not do my job without it.

The app not only helps me at work, but is invaluable to me in communicating with my friends and family. It helps me to feel connected. I don't know what I would do without it!
