

Brian Shirey Comments Docket 18-184

Northshore Broadcasting  
Hammond, Louisiana

My name is Brian Shirley and I am General Manager of Northshore Broadcasting. Our company operates several Class A radio stations. I am in support of adding the C4 to the facility classes. This change would enhance the ability of many FM broadcast stations to better serve their areas of operation. The many Class A stations that can upgrade to the C4 class and operate at a 12,000 watt ERP would be able to better serve residents within current coverage areas. The class C4 would also expand service to new residents currently not served and result in a more efficient use of FM broadcast spectrum. I urge the Commission to, without delay, adopt MB 18-184 and authorize the C4 class FM broadcast stations.

Respectfully submitted

Brian Shirey
