

Regarding MB 18-184

My name is Thomas G. Davis, and I am the CEO of Davis Media, LLC, and the owner of WBQK 107.9 FM, West Point, VA, WTYD 92.1 FM, Deltaville, VA, WXTG 102.1, Virginia Beach, VA, WNTB 93.7 FM in Topsail Beach, NC and WUDE, 106.3FM Bolivia, NC.

I am in full support of the MMTC and SSR Communications FM Class C4 / 73.215 proposal to allow eligible Zone II Class A stations to upgrade in power from 6,000 Watts to 12,000 Watts.

As the owner of five Class A stations, we are protecting stations that are nowhere near our service area, while our ability to fully serve the public is constrained without a logical reason.

Our company prides itself in being there for each of our communities with news, information, community affairs and emergency services. This change in the rules will greatly benefit each community that we serve.

Please implement the MB 18-184 proposal fully without delay.

Sincerely,

Thomas G. Davis
Davis Media, LLC
