Hi Stephen,

Billing has made the adjustment totaling \$115,628.35 over 12 accounts. These credits are expected to post to the 10/2018 invoices. Our E-rate group has been notified and the funding will be reversed back to the USAC for the affected time frame.

Thank you for your patience, let me know if there are any additional questions or concerns,

Sean Simpson
Client Solutions Executive

Hi Sean,

It's recently come up that USAC is showing us as receiving credits to AT&T for this service prior to when it was actually in use. Because of this we can not submit for credit on our Spectrum service that was actually in use during this time. I know you handled the billing side to reflect that we didn't own anything during this time because everything wasn't complete, but has USAC been notified of this or is that something we should be taking care of?

Please let me know how best to address this.

Regards,

Stephen Powers

Hi Sean,

I've tested the point to point to Kalmus and that appears to be working.

I believe I need to have our VLANS configured on the connections between the schools and our district office on the first circuit though, so if you could let me know who I should contact about that I'd appreciate it.

I believe at this time you're good to start billing.

Regards,

Stephen Powers
