**Re: In the Matter of Petition of USTelecom for Forbearance Pursuant to
47 U.S.C. Section 160(c); WC Docket No. 18-141; Category 1**

Dear FCC,

We need to have competition in order to keep growing better connections for internet and even cellphones and keep prices down. Otherwise everything will fail. Prices will hike way up so no one can afford them and newer and faster internet will screech to a halt. We use to only have dial up in Poland, Maine. Then dsl finally came and then broad band. Fiber still isnt even there yet in many places of even auburn Maine let alone many of the other town. If we end competition, then better internet and prices are never going to happen. I need to have fiber internet in my area to better serve my services to other people. My websites and online backup and other servers depend on it. As well as many business in Maine that still cant get fiber internet as well.
