Federal Communications Commission

I am Edward Esserman, a managing member of the above LLC's and licensee of Class A FM stations WRJY and KSAM.

I am writing to support the adoption of Part A of Docket Number MB18-184.

Both locations where I am a licensee have been impacted by numerous hurricanes over the past decade: inland in Texas just north of Houston and immediately along the Georgia coast. During these times of natural emergencies, people find themselves relying on RADIO for their primary source of information and news. The C4 Class would allow us to cover our existing listeners better and reach a bit further into the fringe areas, where many take shelter.

Long after cell service has ceased to remain, and the cable service is without power, radio stations are almost always on the air in smaller towns. In both of our operations we maintain generators capable of operating at least one of our radio stations for up to two weeks.

I ask that you strongly consider Part A of the above Docket, and thank you for the consideration.

Edward N. Esserman
Managing Member
