DOCKET FILE COPY ORIGINAL

Mr. Stephens,

We are writing today to voice our strong disapproval of the current US administration's attempt to remove protections surrounding net neutrality. We ask that protections President Obama put in to place requiring corporations to provide adequate speed of internet service, to not filter information or products the public receives, nor to deny access to the internet by pricing it out of reach for a large segment of our country remain in place.

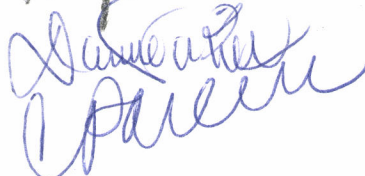

The needs of the many must be put before the interests and profits of a few corporations who control access to the internet. Please do everything in your power to protect net neutrality for the collective good.

Sincerely,

The following residents of the Greater Pasadena area, California
