

Dear FCC Consumer Inquiries and Complaints Division,

Please vote in favor of issues relating to Net Neutrality or the Open Internet. It is important to me that the internet remain equally accessible to everyone to ensure that communication across all groups of people, businesses and government can have an equal voice. I am very concerned that if people and businesses are allowed to get preferential treatment by paying more for speedier websites and service that some important information will no longer be accessible. Another concern of mine is that Internet Service Providers will provide preferential treatment and even block businesses or voices that they do not agree with. Please keep in mind these concerns when faced with these types of issues. Thank you.
