

May 15, 2018

The Honorable Ajit Pai  
Chairman  
Federal Communications Commission  
445 12th Street, S.W.  
Washington, DC 20554

Dear Chairman Pai:

We write to express our strong support and sincere gratitude for the recent Order addressing budget shortfalls in the Universal Service Fund's (USF) High-Cost program. The Order is an essential, immediate step in the right direction, and we now encourage the Federal Communications Commission (FCC) to continue down this path by acting quickly on the notice of proposed rulemaking to provide long-term, predictable support. Such additional steps are necessary to ensure rural Americans have access to high quality voice and broadband services.

The FCC's recent Order approving an infusion of funds into the USF is greatly welcomed, and will provide needed support for small, rural carriers that rely on the High-Cost USF program. Despite this, persistent limitations on resources can affect the ability of smaller broadband providers to deliver services in our country's most rural communities. The FCC's cost model for smaller operators electing model-based USF support is not yet funded at the designed levels, and carriers not receiving model-based support will once again face significant funding cuts when the program's new fiscal year takes effect on July 1, 2018. These recurring budget shortfalls result in lower speeds, more unserved locations, and higher prices for rural consumers and businesses.

Congress has expressed consistent, bipartisan support for addressing shortfalls in the USF program. In April 2017, 58 Senators called on the FCC to provide adequate resources for broadband delivery services to rural consumers in areas that are the hardest and costliest to serve. In May 2017, 102 Representatives wrote to the FCC, expressing similar concerns about the impacts of insufficient USF resources on rural consumers.

We commend the FCC's actions thus far to address and modernize USF support. Taking action on the notice of proposed rulemaking and establishing lasting solutions that allow the reformed High-Cost mechanism to work as designed would enable many smaller operators to offer high quality, affordable broadband to consumers across rural America. It is important to consider any modifications needed to meet the program's objectives of ensuring consistent network build-out and strengthening ongoing service, for locations otherwise unserved, in our nation's high-cost rural areas.

Thank you for the actions you have undertaken thus far to support the USF and for considering this request. We share your goal of eliminating the digital divide and look forward to working with you to maintain accessible, affordable broadband for rural American consumers and businesses.

FEDERAL COMMUNICATIONS COMMISSION  
WASHINGTON

OFFICE OF  
THE CHAIRMAN

August 6, 2018

The Honorable Amy Klobuchar  
United States Senate  
302 Hart Senate Office Building  
Washington, D.C. 20510

Dear Senator Klobuchar:

Thank you for your letter on the importance of high-speed broadband access to rural Americans. I wholeheartedly agree that closing the digital divide is our foremost mission as an agency, and I appreciate your recognition of the work the Commission completed earlier this year to foster further deployment in the most remote corners of our country.

In March, the Commission devoted over \$500 million to increasing deployment by small carriers in rural communities—a reversal of the prior Administration’s policy of punishing these carriers instead of rewarding them for providing high-speed, high-quality services. As part of that action, we also doubled down on our model-based support for hard-to-serve communities, increasing the funding for carriers willing to build out in an efficient manner. In April, we then moved forward by proposing to eliminate many of the legacy burdens for small, model-based carriers serving businesses in rural American—burdens that unnecessarily divert funding from build-out to paperwork. And in June, we eliminated a rule that penalized small rural carriers with extra Universal Service fees whenever they offered broadband.

Nonetheless, I agree with you that more must be done if we’re going to extend digital opportunity to all Americans. That’s why in March the Commission issued a detailed Notice of Proposed Ruling that explores how to ensure sufficient and predictable support over the long term. I agree with you that we must take a close look at expanding access to and funding for our small-carrier cost model and that we must end the unpredictable cuts to carriers not on the model. Increased funding will boost broadband deployment in rural America, and the additional reforms will put our high-cost system on a more efficient path so that every American can benefit from the digital revolution. Commission staff is carefully reviewing the record in the proceeding, and I aim to circulate an order ensuring adequate and efficient funding for rural broadband deployment later this year.

I appreciate your interest in this matter. Please let me know if I can be of any further assistance.

Sincerely,

That's why in March the Commission issued a detailed Notice of Proposed Ruling that explores how to ensure sufficient and predictable support over the long term. I agree with you that we must take a close look at expanding access to and funding for our small-carrier cost model and that we must end the unpredictable cuts to carriers not on the model. Increased funding will boost broadband deployment in rural America, and the additional reforms will put our high-cost system on a more efficient path so that every American can benefit from the digital revolution. Commission staff is carefully reviewing the record in the proceeding, and I aim to circulate an order ensuring adequate and efficient funding for rural broadband deployment later this year.

I appreciate your interest in this matter. Please let me know if I can be of any further assistance.

Sincerely,

A handwritten signature in black ink, reading "Ajit V. Pai". The signature is fluid and cursive, with the first name "Ajit" being the most prominent part.

FEDERAL COMMUNICATIONS COMMISSION  
WASHINGTON

OFFICE OF  
THE CHAIRMAN

August 6, 2018

The Honorable Dianne Feinstein  
United States Senate  
331 Hart Senate Office Building  
Washington, D.C. 20510

Dear Senator Feinstein:

Thank you for your letter on the importance of high-speed broadband access to rural Americans. I wholeheartedly agree that closing the digital divide is our foremost mission as an agency, and I appreciate your recognition of the work the Commission completed earlier this year to foster further deployment in the most remote corners of our country.

In March, the Commission devoted over \$500 million to increasing deployment by small carriers in rural communities—a reversal of the prior Administration's policy of punishing these carriers instead of rewarding them for providing high-speed, high-quality services. As part of that action, we also doubled down on our model-based support for hard-to-serve communities, increasing the funding for carriers willing to build out in an efficient manner. In April, we then moved forward by proposing to eliminate many of the legacy burdens for small, model-based carriers serving businesses in rural America—burdens that unnecessarily divert funding from build-out to paperwork. And in June, we eliminated a rule that penalized small rural carriers with extra Universal Service fees whenever they offered broadband.

Nonetheless, I agree with you that more must be done if we're going to extend digital opportunity to all Americans. That's why in March the Commission issued a detailed Notice of Proposed Ruling that explores how to ensure sufficient and predictable support over the long term. I agree with you that we must take a close look at expanding access to and funding for our small-carrier cost model and that we must end the unpredictable cuts to carriers not on the model. Increased funding will boost broadband deployment in rural America, and the additional reforms will put our high-cost system on a more efficient path so that every American can benefit from the digital revolution. WASHINGTON

OFFICE OF  
THE CHAIRMAN

August 6, 2018

The Honorable John N. Kennedy  
United States Senate  
B11 Russell Senate Office Building  
Washington, D.C. 20510

Dear Senator Kennedy:

Thank you for your letter on the importance of high-speed broadband access to rural Americans. I wholeheartedly agree that closing the digital divide is our foremost mission as an agency, and I appreciate your recognition of the work the Commission completed earlier this year to foster further deployment in the most remote corners of our country.

In March, the Commission devoted over \$500 million to increasing deployment by small carriers in rural communities—a reversal of the prior Administration's policy of punishing these carriers instead of rewarding them for providing high-speed, high-quality services. As part of that action, we also doubled down on our model-based support for hard-to-serve communities, increasing the funding for carriers willing to build out in an efficient manner. In April, we then moved forward by proposing to eliminate many of the legacy burdens for small, model-based carriers serving businesses in rural American—burdens that unnecessarily divert funding from build-out to paperwork. And in June, we eliminated a rule that penalized small rural carriers with extra Universal Service fees whenever they offered broadband.

Nonetheless, I agree with you that more must be done if we're going to extend digital opportunity to all Americans. That's why in March the Commission issued a detailed Notice of Proposed Ruling that explores how to ensure sufficient and predictable support over the long term. I agree with you that we must take a close look at expanding access to and funding for our small-carrier cost model and that we must end the unpredictable cuts to carriers not on the model. Increased funding will boost broadband deployment in rural America, and the additional reforms will put our high-cost system on a more efficient path so that every American can benefit from the digital revolution. Commission staff is carefully reviewing the record in the proceeding, and I aim to circulate an order ensuring adequate and efficient funding for rural broadband deployment later this year.

I appreciate your interest in this matter. Please let me know if I can be of any further assistance.

Sincerely,

  
Ajit V. Pai

I wholeheartedly agree that closing the digital divide is our foremost mission as an agency, and I appreciate your recognition of the work the Commission completed earlier this year to foster further deployment in the most remote corners of our country.

In March, the Commission devoted over \$500 million to increasing deployment by small carriers in rural communities—a reversal of the prior Administration’s policy of punishing these carriers instead of rewarding them for providing high-speed, high-quality services. As part of that action, we also doubled down on our model-based support for hard-to-serve communities, increasing the funding for carriers willing to build out in an efficient manner. In April, we then moved forward by proposing to eliminate many of the legacy burdens for small, model-based carriers serving businesses in rural American—burdens that unnecessarily divert funding from build-out to paperwork. And in June, we eliminated a rule that penalized small rural carriers with extra Universal Service fees whenever they offered broadband.

Nonetheless, I agree with you that more must be done if we’re going to extend digital opportunity to all Americans. That’s why in March the Commission issued a detailed Notice of Proposed Ruling that explores how to ensure sufficient and predictable support over the long term. I agree with you that we must take a close look at expanding access to and funding for our small-carrier cost model and that we must end the unpredictable cuts to carriers not on the model. Increased funding will boost broadband deployment in rural America, and the additional reforms will put our high-cost system on a more efficient path so that every American can benefit from the digital revolution. Commission staff is carefully reviewing the record in the proceeding, and I aim to circulate an order ensuring adequate and efficient funding for rural broadband deployment later this year.

I appreciate your interest in this matter. Please let me know if I can be of any further assistance.

Sincerely,

  
Ajit V. Pai

And in June, we eliminated a rule that penalized small rural carriers with extra Universal Service fees whenever they offered broadband.

Nonetheless, I agree with you that more must be done if we’re going to extend digital opportunity to all Americans. That’s why in March the Commission issued a detailed Notice of Proposed Ruling that explores how to ensure sufficient and predictable support over the long term. I agree with you that we must take a close look at expanding access to and funding for our small-carrier cost model and that we must end the unpredictable cuts to carriers not on the model. Increased funding will boost broadband deployment in rural America, and the additional reforms will put our high-cost system on a more efficient path so that every American can benefit from the digital revolution. Commission staff is carefully reviewing the record in the proceeding, and I aim to circulate an order ensuring adequate and efficient funding for rural broadband deployment later this year.

I appreciate your interest in this matter. Please let me know if I can be of any further assistance.

Sincerely,

FEDERAL COMMUNICATIONS COMMISSION  
WASHINGTON

OFFICE OF  
THE CHAIRMAN

August 6, 2018

The Honorable Tim Scott  
United States Senate  
520 Hart Senate Office Building  
Washington, D.C. 20510

Dear Senator Scott:

Thank you for your letter on the importance of high-speed broadband access to rural Americans. I wholeheartedly agree that closing the digital divide is our foremost mission as an agency, and I appreciate your recognition of the work the Commission completed earlier this year to foster further deployment in the most remote corners of our country.

In March, the Commission devoted over \$500 million to increasing deployment by small carriers in rural communities—a reversal of the prior Administration's policy of punishing these carriers instead of rewarding them for providing high-speed, high-quality services. As part of that action, we also doubled down on our model-based support for hard-to-serve communities, increasing the funding for carriers willing to build out in an efficient manner. In April, we then moved forward by proposing to eliminate many of the legacy burdens for small, model-based carriers serving businesses in rural American—burdens that unnecessarily divert funding from build-out to paperwork. And in June, we eliminated a rule that penalized small rural carriers with extra Universal Service fees whenever they offered broadband.

Nonetheless, I agree with you that more must be done if we're going to extend digital opportunity to all Americans. That's why in March the Commission issued a detailed Notice of Proposed Ruling that explores how to ensure sufficient and predictable support over the long term. I agree with you that we must take a close look at expanding access to and funding for our small-carrier cost model and that we must end the unpredictable cuts to carriers not on the model. Increased funding will boost broadband deployment in rural America, and the additional reforms will put our high-cost system on a more efficient path so that every American can benefit from the digital revolution. Commission staff is carefully reviewing the record in the proceeding, and I aim to circulate an order ensuring adequate and efficient funding for rural broadband deployment later this year.

I appreciate your interest in this matter. Please let me know if I can be of any further assistance.
