Re: Inquiry Concerning 911 Access, Routing, and Location in Enterprise Communications Systems, PS Docket 17-239

Dear Ms. Dortch:

On August 17, 2018, I had the pleasure to speak with Eric Burger, FCC CTO during a phone conversation to discuss Kari's Law New Requirements for Multi-Line Telephone Systems. The purpose of the meeting was to tackle questions and concerns of VoIP-based service providers and to understand the compliance requirements for all end users - such as agencies and businesses. I thoroughly explained the process by which UniVoIP has been deploying the new Notification service triggered when employees make 911 calls. In fact, those steps have been clearly and methodically explained during the call and made available to you in the attached document.

Please feel free to contact me should you have any questions.

Respectfully,

A handwritten signature in black ink, appearing to read 'Chris Vuillaume', written over a horizontal line.
