**Re: In the Matter of Petition of USTelecom for Forbearance Pursuant to  
47 U.S.C. Section 160(c); WC Docket No. 18-141; Category 1**

Dear FCC,

I have today and demand access to in the future competitive services. I've been a small business owner and a consumer in California is for 20 years. Competition is crucial for competitive services within California. Since the requirement for ala cart TV access was never properly enforced co mm petition is the only way consumers are not forced I to expensive plans that start at around one hundred channels.

I'm also appalled at the fact that the changes the FCC made to net neutrality, and promised would have zero impact, have clearly caused problems with access provided to emergency services and first responders during emergencies in California. This is the obvoius outcome of shortsighted policies made by the people put in charge of the FCC. These issues were clearly part of the debate about why net neutrality existed. This had direct impact on life and livelyhood of citizens of this country. Tour short sighted and monopolistic decisions had direct impact on lives. I demand action to restore competitive services and prevent service providers from doing any type of throttling of services. Anything less and the next petition I sign will be to demand the resignations of those responsible and they be held civilly or criminally accountable for deaths that can be tied directly to the lack of throttling if internet access by emergency services.
