

The FCC must defend the rights of Internet users like me, by upholding & staying true to current net neutrality safeguards.

I connect and collaborate online daily. The internet, with net neutrality safeguards, is a must because it keeps the Internet open and free - free from ISPs altering speed & access in their favor.

We don't need discrimination and inequity to thrive on the Internet.

Please don't disturb Title II. Keep the Internet secure with everyone in mind.

Best,

Coretta Jackson
