**Re: In the Matter of Petition of USTelecom for Forbearance Pursuant to
47 U.S.C. Section 160(c); WC Docket No. 18-141; Category 1**

Dear FCC,

Citizens of a free country should have access and the right to chose who to do business with. A few internet providers should not have the right to corner a market and dictate whatever prices they choose to force on the public. A Competitive market keeps technology evolving and allows local companies to provide services to locals at competitive prices. We are in the digital age. And this necessary technology should be available to everyone for a fair price. We use internet everyday to conduct our business; our children use it everyday to complete their homework and to learn; we use it to pay bills, to be in touch with family and friends. Internet service is critical to the infrastructure of todays society. It should not be held in the hands of a few so that they can get rich while we pay exorbitant prices for inferior technology. Please support a competitive market! Its the right thing to do!
