**Re: In the Matter of Petition of USTelecom for Forbearance Pursuant to
47 U.S.C. Section 160(c); WC Docket No. 18-141; Category 1**

Dear FCC,

I recently moved to San Francisco where I had to install home internet with a limited selection of providers.

In the end I found quality service from a local provider who in turn rely on AT&T network. AT&T really dragged their heels in facilitating a cable into my building.

My own work was held up, in addition to my day job I work evenings and weekends on other projects. I billed less in July, and also consequently paid less tax in July, since I never met my usual hours due to insufficient internet. I had to wait all in all for 2 weeks for this to be installed.

Competition keeps business and industry strong. Competitive internet provision has external, indirect benefits too.

I support local broadband competition and you should too.
