47 U.S.C. Section 160(c); WC Docket No. 18-141; Category 1**

Dear FCC,

I am a consumer who supports broadband competition. America needs high broadband penetration to be competitive in the world economy. The rates should be competitive and the consumer should have choices. High speed internet enables workers from all over the country to work together and fiber allows workers to work from home which keeps air pollution lower and eliminates commute times.
