**Re: In the Matter of Petition of USTelecom for Forbearance Pursuant to
47 U.S.C. Section 160(c); WC Docket No. 18-141; Category 1**

Dear FCC,

I have been receiving my DSL Internet services from Sonic.net of Santa Rosa, CA and most recently, my Fiber high speed services from LMi.net. of Berkeley, CA. They both offer the most competitive pricing and superior customer service available in my area. I now receive 1000 Mbps fiber service and my phone for \$49.00 per month. I receive all my streaming Audio & Video services and I'm also able to run all my security cameras without any problems as there are NO Data caps or usage limitations of any kind. These services from AT&T would cost me more than twice as much and I'd need to deal with their crappy customer service. I recently had a router setup problem that I was unable to remedy and was able to walk into LMi.net's local office where one of their Technicians was able to remotely solve my problem. I'm 73 years old and have limited computer skills and a fixed income so being able to get my Internet services at a reasonable price is imperative.
