**Re: In the Matter of Petition of USTelecom for Forbearance Pursuant to
47 U.S.C. Section 160(c); WC Docket No. 18-141; Category 1**

Dear FCC,

at the place of my residence only two internet service providers own a wire respectively cable connection to the apartments. Due to an exclusive contract with the homeowners association there is no chance of any additional network connections. Currently my internet service is provided by a third party using the AT&T network. Their services are much more reliable and available at a much lower price while offering higher throughput. It should be your goal to have at least four competing ISPs in every local market. Third party access to existing networks is essential for that.

Best Regards,
Peter Zepter
