

I am speaking on behalf of my family, the request to maintain net neutrality. The internet is one of the foundations of our economy here in the United States. The innovation that comes from open and unrestricted access to internet, will continue to benefit all classes and ethnicity's of people in this country. Do not restrict our right to access information and enhance the well being of our country, at the interest of a few corporations. Maintain the protections for net neutrality that were put into effect in 2015
