ABC Censors Catalyst Wifi Report, Suspends Reporter, and Embarrasses Itself

July 7, 2016 by Global Freedom Movement 4 Comments

Why the censorship, ABC?

“Wi-Fried”: Why fried?

What is the ABC trying to hide by taking down the Catalyst wifi report (February 2016) by Dr Maryanne Demasi? Who are they covering for? (Well, okay, that should be fairly obvious.)

Perhaps “ABC” is really an acronym for Abominable Broadcasting Censorship?

In a nutshell, the “public” broadcasting platform has caved in to industry (it’s not the first time) and its designated “scientific” spokespersons.
Briefly, in February this year, reporter Maryanne Demasi put together this Catalyst wifi report, entitled “Wi-fried”, highlighting the potential “hidden” dangers of wi-fi. However, she has now been suspended until September while an “investigation” into the episode is carried out. Evidently “the investigation was initiated after the ABC received complaints from viewers about the episode.”

The “complaints from [unidentifiable] viewers/the public” strategy has been trotted out many times before as a means of autocratic corporate entities suppressing information that might threaten their profit margins (or risk expensive litigation) lest the public catch on. Who are these alleged “viewers”? They wouldn’t happen to be captains of industry by any chance? It couldn’t possibly be people in high places with influence and intimidatory powers who happened to make the “complaints” could it?

“Wi-fried” on ABC 2016 from damien curtis on Vimeo.

It’s a strategy that has been used before in regards to the health and medical fields, whereby members of vested interest groups who are embedded in the Establishment (or well connected to it) actually write anonymous letters to their own or their cronies’ agencies “complaining” of this or that company or individual in order to get them “investigated” and ultimately shut down. This is how embedded vested interests consolidate their power and revenue and eliminate the economic competition and/or suppress damaging information (damaging to their bottom line, that is). It’s precisely how the AMA and allied groups attacked and discredited natural/alternative therapies, particularly naturopathy, chiropractic, osteopathy, herbalism, acupuncture, and so forth, going back as far as the 1950s. The economic competition must be destroyed.

Litigating was also a favourite strategy, and perhaps there have been threats made behind closed doors to that effect vis à vis Demasi’s “Wi-Fried” Catalyst wifi report. Perhaps. Outright lies are, of course, standard fare, even obligatory. The truth must be buried and the competition annihilated, and B-grade sellout scientists who will spout suitably biased propaganda thinly veiled as “science” in order to quash alternative views/thinking are a dime a dozen.

The Orwellian-sounding Audience and Consumer Affairs Unit (A&CA) was tasked with “reviewing” Demasi’s wifi report after the “complaints” were made:

“The A&CA Report found several inaccuracies within the program that had favoured the unorthodox view that mobile phones and Wi-Fi caused health impacts including brain tumours,” the ABC’s statement said.¹ [emphasis added]
That should tell you everything you need to know. If information in the mainstream “favours the unorthodox view” then forget about it. As a general rule, it will either never make it to air, or if it does, a kerfuffle will anonymously be created by vested interests, and lo and behold!, it will magically disappear from view, never to be seen again. That’s why I’m encouraging some basic civil disobedience and suggesting that everyone upload this video all over the internet. The communications industry doesn’t want us to see the harm its technology is causing? Let’s put it everywhere then. (See the addendum at bottom for information regarding radio frequency and microwave harm.)

This is the second time Demasi has landed herself in hot water by attempting to carry out genuine journalism and objective reporting in the lamestream media. The first time she was slapped on the wrist for a 2013 2-part episode of Catalyst (“Heart of the Matter”) wherein she dared to suggest that, just maybe, cholesterol-lowering drugs are being over-prescribed. Really? Ya think? The show also questioned links between cholesterol and heart disease. (In fact, cholesterol-lowering drugs are proving to be one of the all-time medical cons.) The managerspeak from the ABC’s “review” of that episode is staggering:

“Although the program did not explicitly endorse the unorthodox view, the language used by the reporter tended to add weight to the contrarian argument

“In our view, the program could have done a better job of teasing out the mainstream perspective to leave audiences better informed.”² [emphasis added]

Additionally (and unsurprisingly), Demasi also compiled a report about anti-depressants which conveniently never saw the light of day: it was forbidden from being aired after “concerns were raised inside the ABC”, according to Media Watch.³

Heaven forbid that we articulate anything but the mainstream perspective! Goodness me, people will explode in the street! Cannibals will feast on our flesh and the four horsemen of the apocalypse will herald the Lord’s imminent fiery wrath! (Also, failing to adhere to the mainstream viewpoint kills babies, you know.)

ABC you are absolutely pathetic, and this kind of behaviour is exactly why awakening people are turning the TV off in droves.
Why is truthful reporting unacceptable in the lamestream media? Does industry have its talons in the “venerable” ABC? *shock! horror!* Surely not!

Naughty, naughty, Dr. Demasi. That should teach you for trying to sneak one (make that three!) past the Thought Police.

Just be a good little shill/sellout and toe the line like the others, okay?

ABC: Abominable Broadcasting Censorship

About the Author
Co-founder of Global Freedom Movement and host of GFM Media, Brendan D. Murphy is a leading Australian author, researcher, activist, and musician. His acclaimed non-fiction epic *The Grand Illusion: A Synthesis of Science & Spirituality – Book 1* is out now! Come and get your mind blown and DNA/kundalini activated at [www.brendandmurphy.net](http://www.brendandmurphy.net)

“Brendan is the Chomsky of the Spiritual movement.” – Alistair Larmour, medical intuitive

“Every person in the field of ‘paranormal’ psychology or related topics should have this book as a major reference.” – Dr. Buryl Payne

“A masterpiece…*The Grand Illusion* is mind-blowing.” – Sol Luckman, author of *Potentiate Your DNA. “You’ve written the best synthesis of modern science and esoteric science that I’ve seen in 40 years…Brilliant!”* – Michael K. Wade

Addendum: Adverse Health Effects of EM radiation, Wifi, and Smart Meters

1. Research article by Dr. Carl Blackman showing that frequency modulation (not the carrier wave) is the primary reason for non-thermal biological effects: [https://www.emfanalysis.com/wp-content/uploads/2015/06/blackman-modulation-2009.pdf](https://www.emfanalysis.com/wp-content/uploads/2015/06/blackman-modulation-2009.pdf)
4. 52 Medical Doctors and Researchers respond to industry PR that “smart” meters are safe: [https://maisonsaine.ca/sante-et-securite/electrosmog/smart-meters-correcting-gross-misinformation.html](https://maisonsaine.ca/sante-et-securite/electrosmog/smart-meters-correcting-gross-misinformation.html)
5. Red blood cells are affected by microwave radiation from wireless smart meters: [http://www.youtube.com/watch?v=y4JDEspdx58](http://www.youtube.com/watch?v=y4JDEspdx58)
8. Graph with 67 studies that show health effects well below government limits and the corresponding effects of smart meters – See the following PDF, as well as the graphic: [Ron Powell Smart Meter Report](https://www.emfanalysis.com/wp-content/uploads/2014/11/Powell-Bioinitiative-Report-SmartMeters.pdf)
9. “Our EMF/RFR standards are also based on an outdated assumption that it is only heating (thermal injury) which can do harm. These thermal safety limits do not address low-intensity (non-thermal) effects. The evidence is now overwhelming that limiting exposure to those causing thermal injury alone does not address the much broader array of risks and harm now clearly evident with chronic exposure

12. “Studies document roles of pulsation in influencing biological responses to microwave exposures, influences that are incompatible with these being produced by heating. ‘Window’ effects occur, where specific intensities of microwave EMF exposure produce higher biological effects than those produced by both lower and higher intensities, observations incompatible with heating effects.” Ibid.

13. “Thousands of studies have reported biological effects at intensities well within safety standards, each of which appear to falsify the heating/thermal paradigm,” none of which have been considered by the “experts” who have deemed this technology be placed on/in our homes.

14. Wi-fi has been banned from schools in Haifa, the third largest city in Israel, to protect the children from unnecessary and dangerous wi-fi exposure

15. Electrohypersensitivity (EHS) is a growing problem and evidently being exacerbated by smart meter rollouts. Sweden recognises this syndrome and offers disability pensions to sufferers.

16. Suicides have resulted from cases of EHS; being trapped in a world with no respite from wifi radiation is a cruel form of punishment that eventually overwhelms some people.

17. The phenomenon known as “EMF refugees” has resulted from wireless technology, wherein people become so sensitized to wireless microwave radiation that they have to abandon the use of such technology and also move to an area which is not polluted by it. See the film Searching for a Golden Cage

19. Jeromy Johnson TedX Talk: “I wanted to convey that people are indeed being harmed by this technology and that there is adequate science to show how and why this is happening.” Link: https://www.emfanalysis.com/tedx-wireless-wake-up-call/

20. Bee Colony Collapse Disorder (CCD) can be partially explained by the increased microwave radiation in our environment from wireless technologies the past decade – a new study out of Switzerland: http://www.cellphonetaskforce.org/?page_id=672 If you kill the bee populations off, humans go with them. Are you listening yet?

23. 2015 study showing 2.4 GHz WiFi decreases sperm function. Researchers conclude that “there should be major concern regarding the exposure to Wi-Fi networks existing in the vicinity of our living places.” http://www.ncbi.nlm.nih.gov/pmc/articles/PMC4503846/

GREAT ARTICLE and thank you so much also for all you other work. I would venture to suggest, though, that we get used to the idea that calling our press “free” means nothing more than “Privately Owned.” There’s no sense “calling them out!” They ARE the corporate interests.

I had my wifi router below my desk at chair level for years. It was the most convenient spot for Comcast to install it. I work from home and spent a majority of my time in front of this wifi machine.

Last week I had my testicles removed. The doctors told me that they had never seen the level of cancers on anyone before. It makes me sad now that my wife will never be able to have the child named Angela she always wanted.
This article just confirms that my testicles were victims to Wifi. I feel at this point legal action is all that I can do to show Comcast that wifis should be illegal, cause it’s obviously more dangerous than smoking. I have smoked my entire life and never had any cancer in my testicles until the wifi box machine was installed.

I pray for all the other men that this may happen to.
