

## **We support Title II Telecommunication**

We support Net Neutrality. As US citizens and taxpayers we make our stand **against** the proposed reversal of the Title II classification. All this, is a waste of tax payers money and time. The internet is already free and it has been working just fine for decades. Why the new administration wants to mess with a good thing is beyond me.

## **NO! NO to ‘Restoring Internet Freedom’**

Its already free, there are already rules set in place that work perfectly. There is no need for this proposal. Leave the internet as is.

## **Net Neutrality Tittle II**

**Telecommunication Act should stay just the way it is.**
