Re: WC Docket No. 17-108

I join the millions of people who have spoken out to fully support Net Neutrality. It is vital to maintaining a fair and open internet. Maintaining Net Neutrality will enable new technologies, prevent companies from unfairly charging costumers and costing people too much money and prevent the US from remaining a leader in computer services. The repeal of Net Neutrality is a step backwards, not forwards.

Sincerely,

Jeffrey P. Utz, M.D.
